ALYNEX ARTIFICIAL INTELLIGENCE

Zinzi

Unique social media

A unique social media platform for celebrities & their followers

Social Networking • App • iOS • Android • Tech

The two users were 'The Celebrities' and 'The Followers'. The celebrities were registered by admin after the admin gathered personal data. Once the celebrity profile was created they could post exclusive content for their followers, which once posted on Zinzi couldn't be posted anywhere else.

- The biggest challenge while designing this was to keep the experience around the user journey similar and relevant to each user.
- The driver would then notify the user with a ballpark estimation of the items as well as inform them of the unavailable items.The user can either confirm the order or decline it.

shopnewtofund

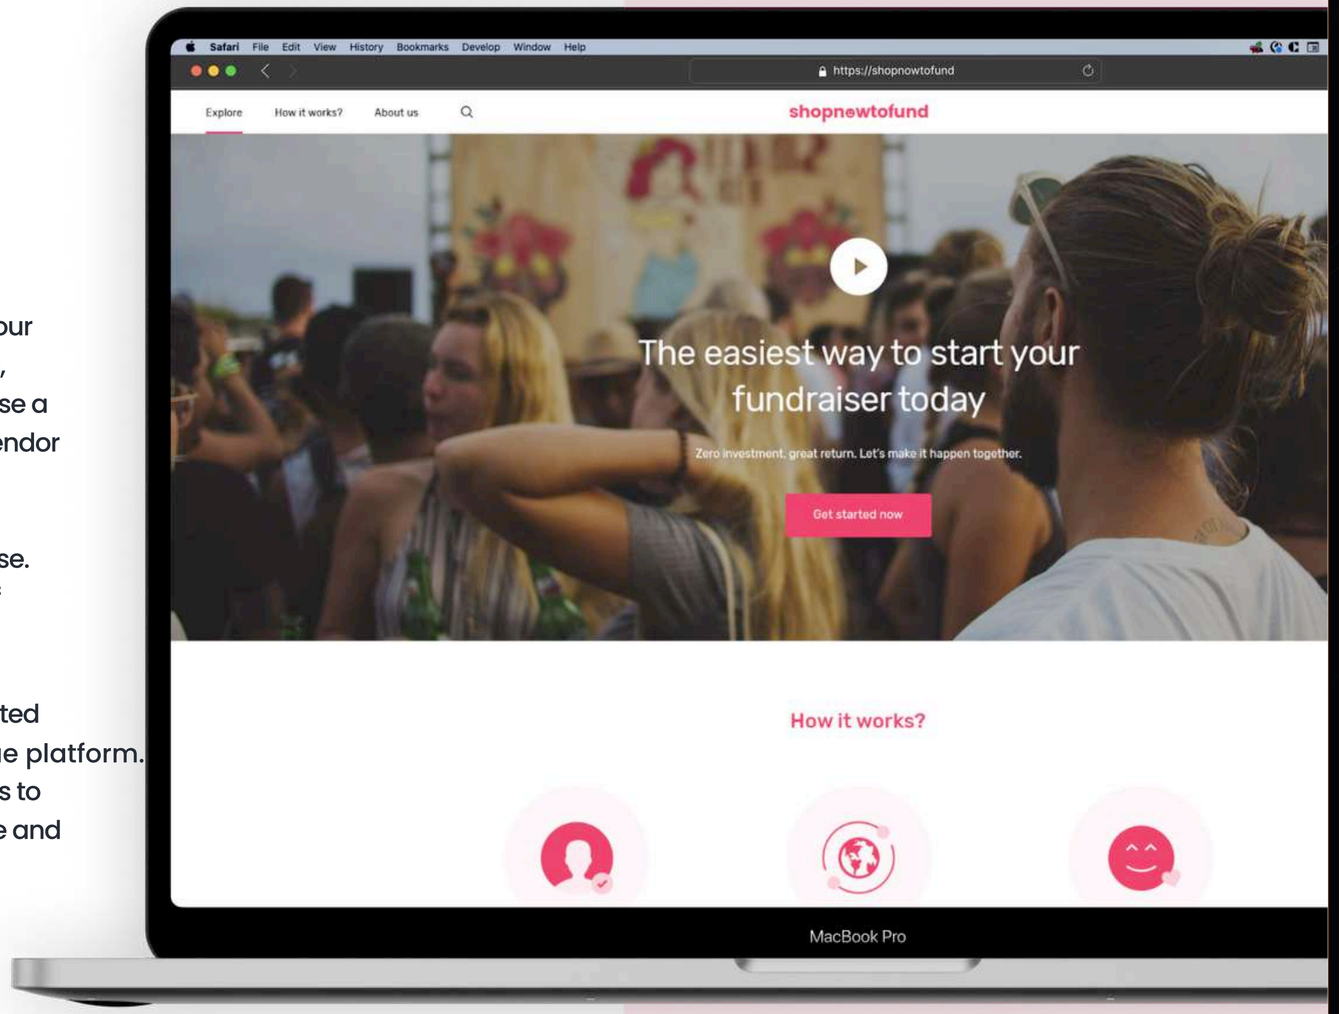

Shop, raise fund, do good

Charity • Web • Laravel

ShopNowToFund is the website where innovators come on our website, create campaigns for the funds. On the other hand, vendors add their products for sale. Once a user will purchase a product from our website then some amount goes to the vendor and some amount is donated for campaigns.

It is not just like any other online marketplace you already use. Although it has one very unique difference. They give 40¢ of every $1 you spend on their website to a “do-good” cause.

The client has been in this business for a long time and wanted Alynex A.I to completely revamp the UI/UX of this unique platform. The only thing while designing this was to attract more users to shop here, simplify due to its seamless shopping experience and intuitive features.

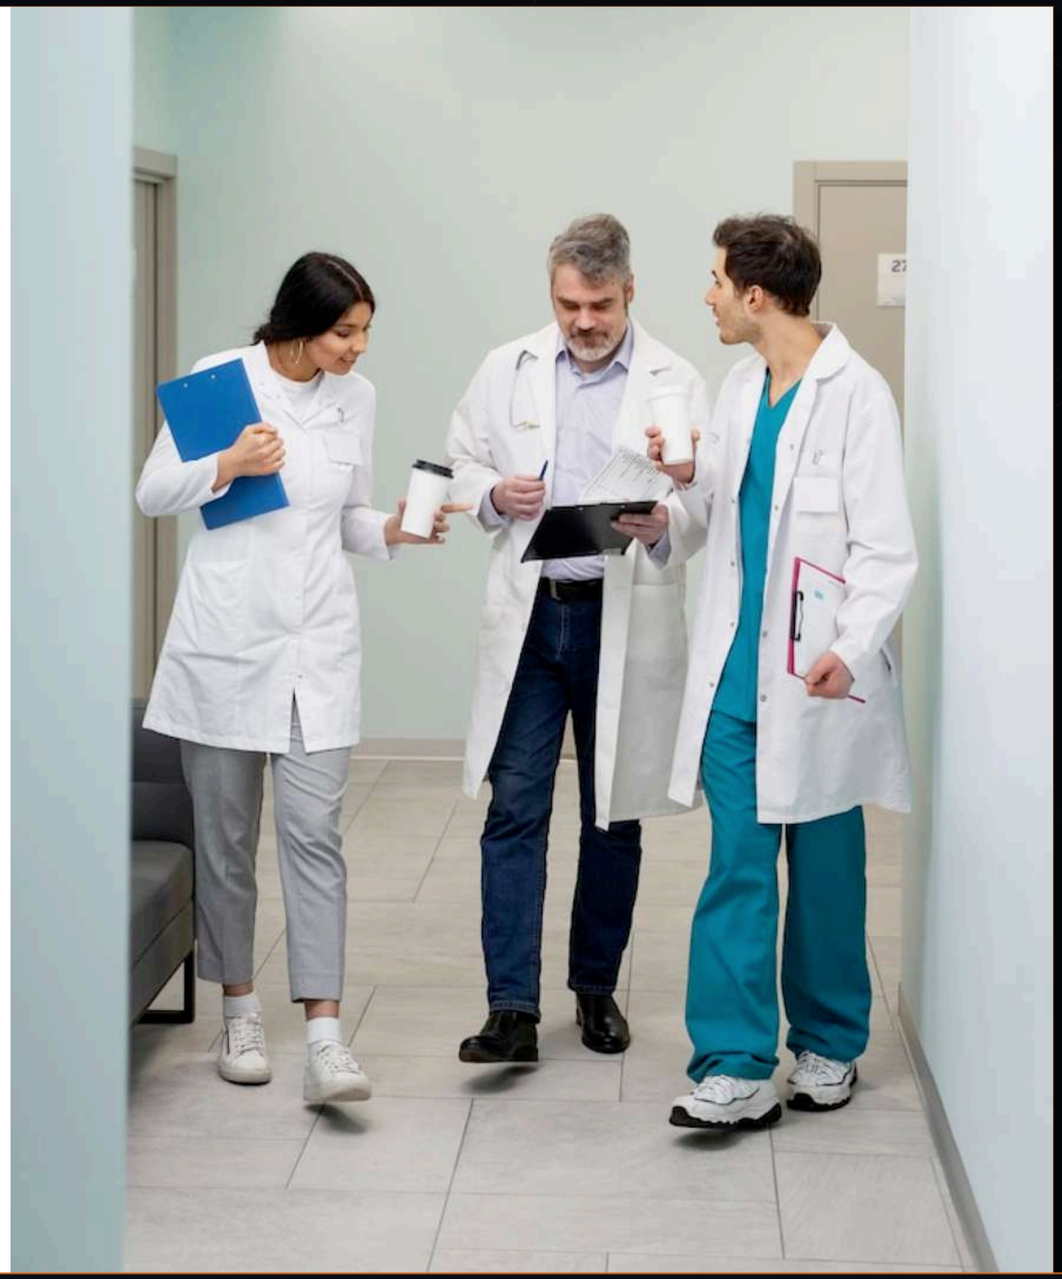

JACKSON & COKER — LOCUM TENENS —

Staffing solution for healthcare industry

Healthcare • Web • PHP

Jackson & Coker, a top healthcare staffing firm with nationwide reach, approached us with an intention to expand their business opportunities and bring the whole physician community under one roof to serve patients with a high caliber of service and courtesy. They envisioned streamlining staffing solutions for hassle-free management, with less turnaround time for the physicians or employers to search for jobs.

- The emergence of an online portal has resulted in a wide spectrum of benefits to the client in gaining maximum advantages from existing, as well as new users.
- Employer interest has skyrocketed and a litany of hospitals and healthcare facilities have partnered with the client to gain access to the expansive physician community
- Patients have access to the best healthcare providers in their local communities made possible through a location-based search on the web platform.

ALYNEX ARTIFICIAL INTELLIGENCE

Gofer

Grocery Pickup & Delivery

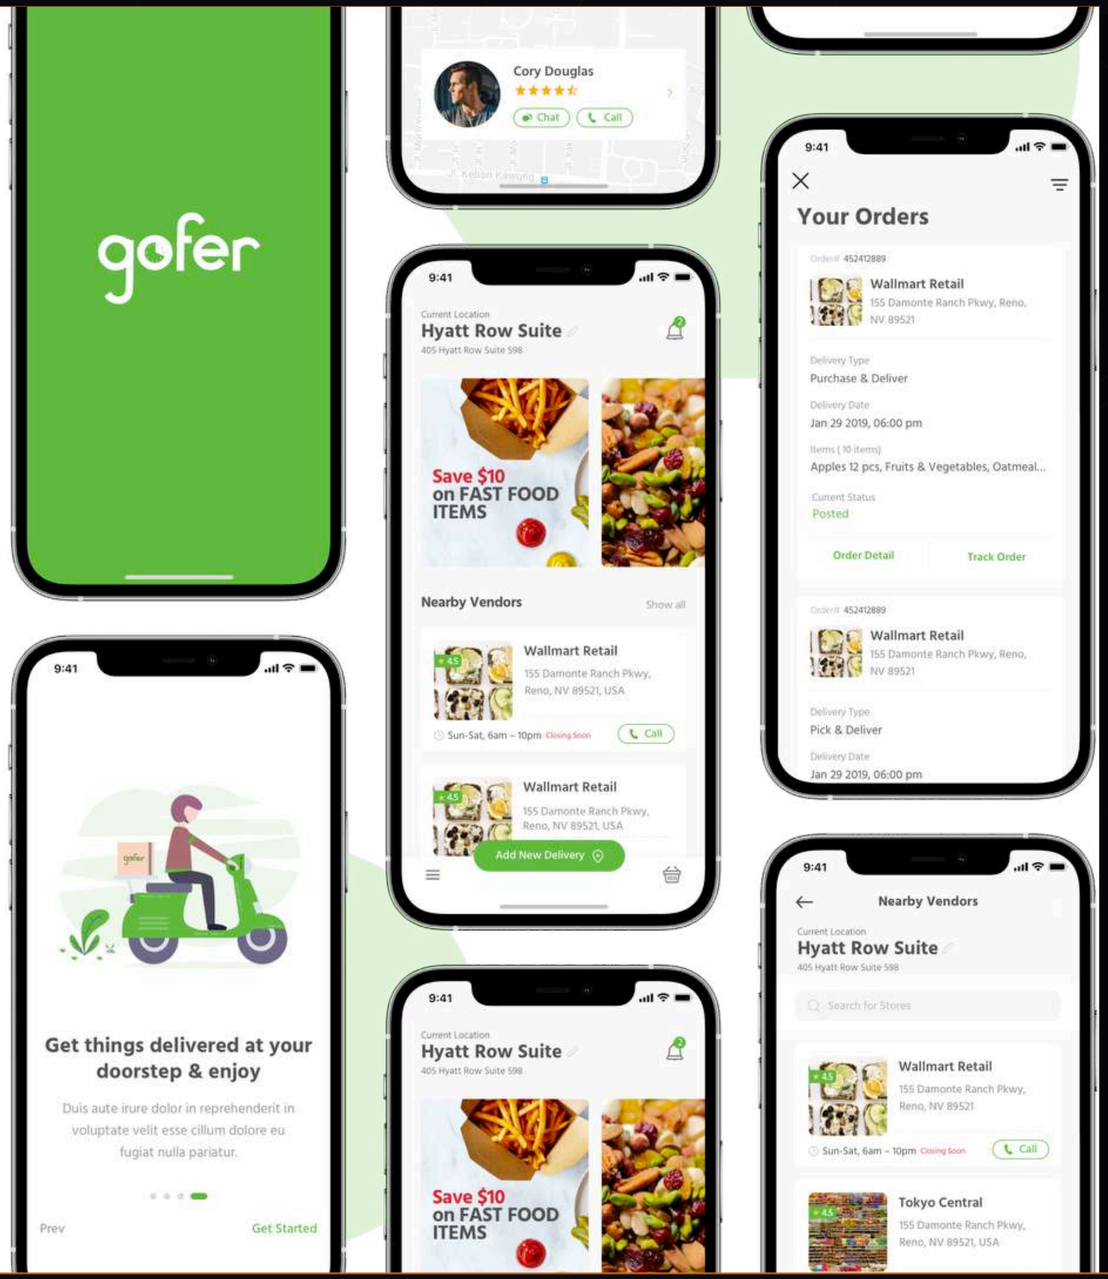

How we changed the experience around running errands through gofer

Delivery • App • iOS • Android

Gofer is an app that fosters the way people purchase grocery or get things picked up and delivered at their homes. With just a click of a few buttons, you can order, approve, cancel, track and receive your order in no time.

We designed two flows for the app, One where the driver can either pick up the requested items or can purchase products requested by the users through the app.

- Nearby Vendor
- Place Order
- Token Amount | Review Order

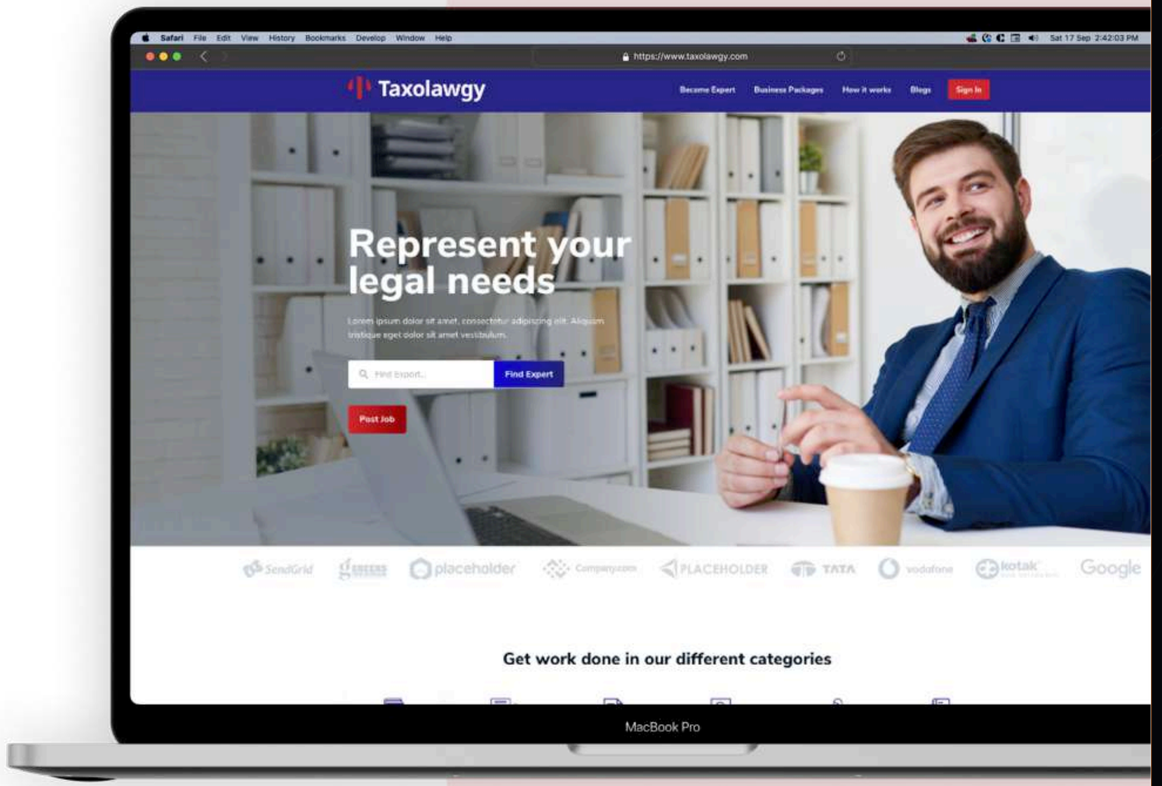

Taxolawgy

Interactive corporate training solution

Education • App • HTML5

The client was looking to revamp their existing ICT application built using Adobe Flash to an improved version by leveraging trending technologies. The aim was to develop a platform where the structure would be simple, efficient and user-friendly to educate doctors through their ICT app. We also helped Abbott to overcome the limitations of Adobe Flash-based application by rebuilding the structure of the app using HTML5 technology.

- The resultant application is an education kit, which can run offline with the help of DVD/CD/USB, using a static browser. It eliminates the dependency of flash and active internet connection to study.
- The new ICT app proved to be a handy education tool for doctors and nurses through which they could access virtual cases with individual journal information and patient history, X-ray plates, medication history, etc.

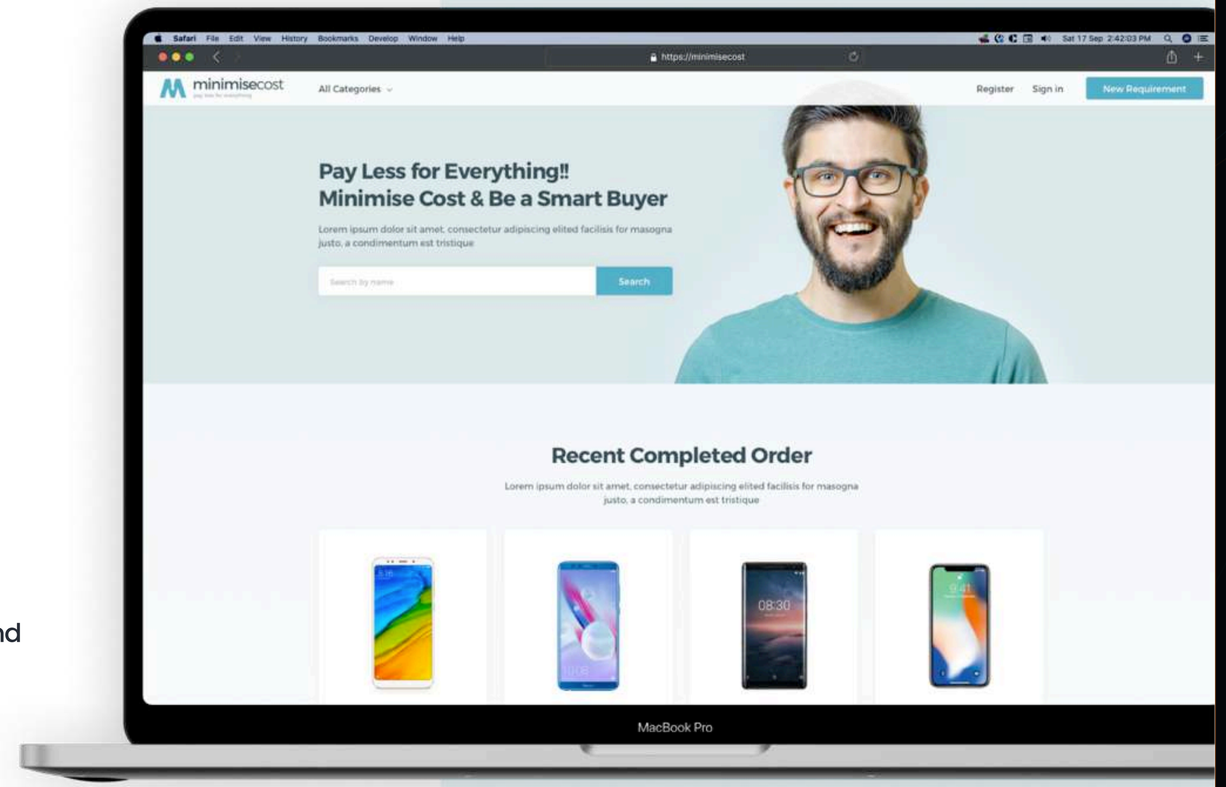

minimisecost
pay less for everything

A price bidding platform to purchase electronic appliances

E-commerce • web • Laravel

After long discussions with the client, we introduced the idea of creating a price bidding platform where interested buyers can add different price bids for the same product, for a given quantity. On the other hand suppliers too can add their respective bids for the same.

- A Buyers Offer them most prominent deals and "Interest Focused" design.
- Quick checkout process
- Sellers Transparency for seeing best incoming interested buyers and figure out the best deal.
- Admin birds eye view of buyers, products, sellers and orders.
- Marketing

Quickee

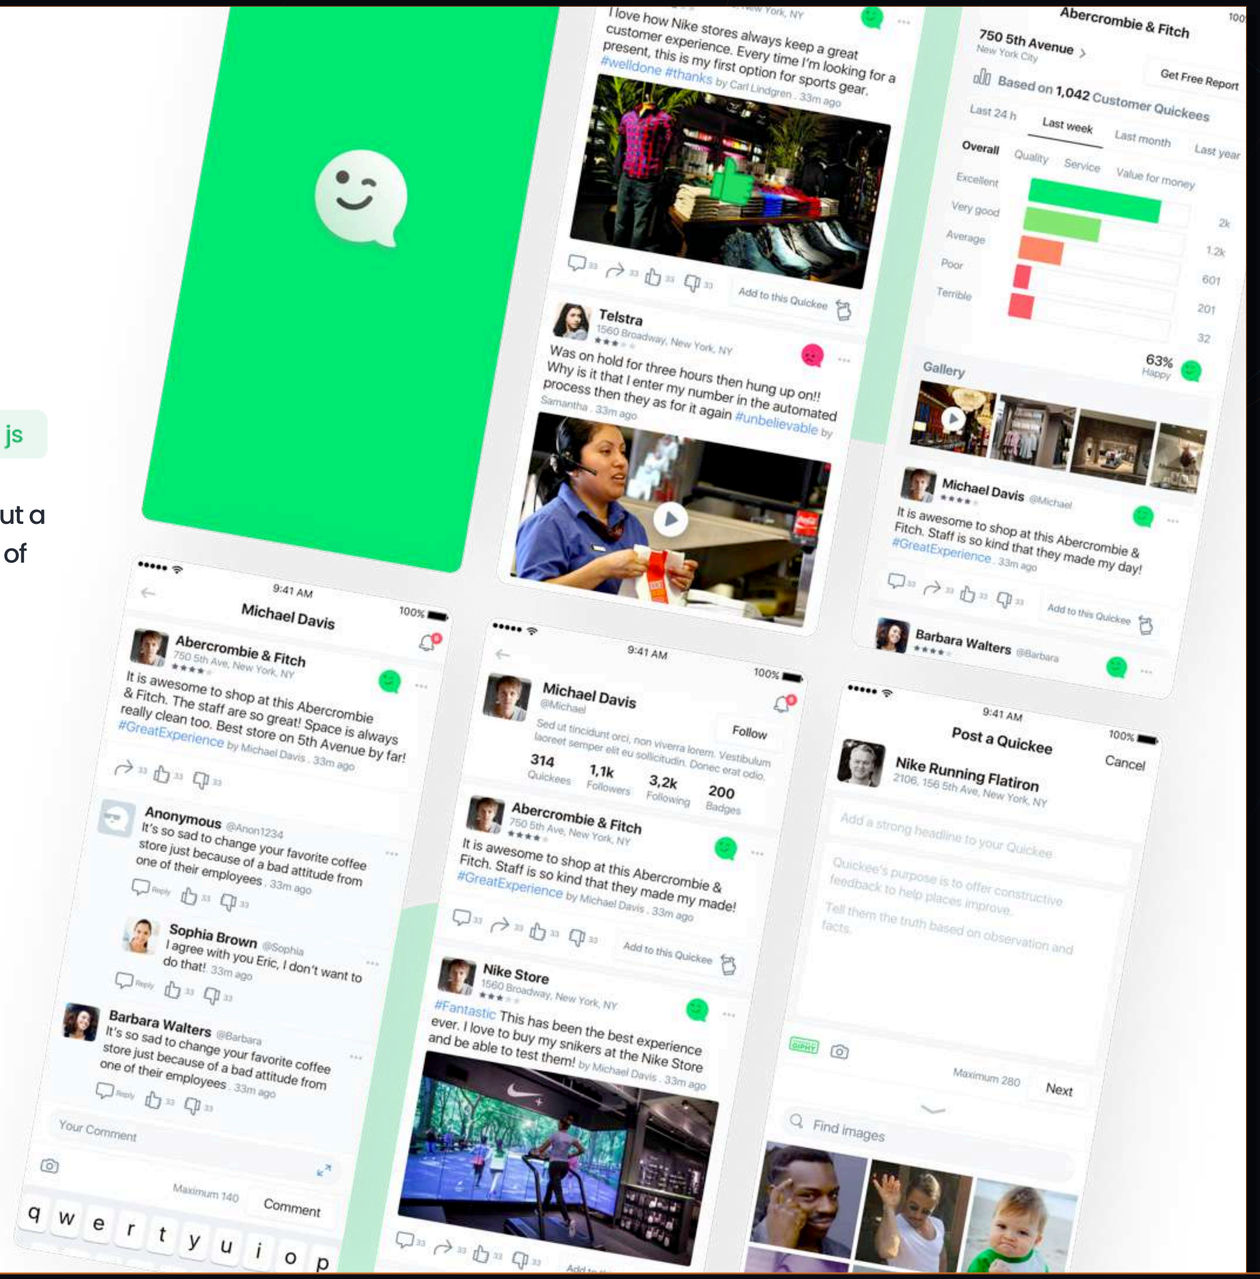

Social Networking App

People on the move

Social networking • App • iOS • Node js

Job Search India, Vacancy Alert, Online Work

Recruiment • App • Android • Python

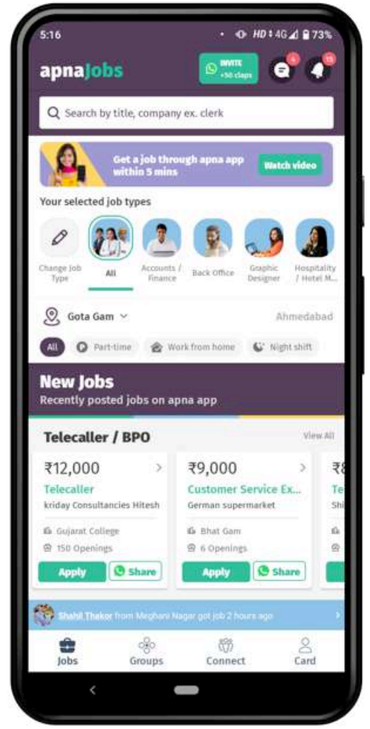

Successfully Raised

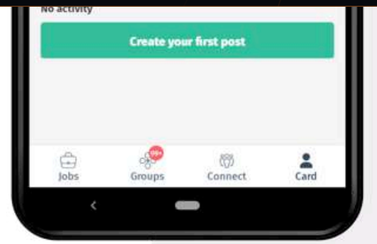

$ 190M +

Apna is an Indian digital recruiting company that links companies with millions of blue-collar workers. Job seekers may use the platform to build a profile for opportunities and be hired. Employers may use it to advertise job openings, interact with prospects, arrange interviews, and recruit employees.

The app comprises over 70 communities for skilled professionals apart from finding jobs and helping with peer-to-peer & community-based learning.

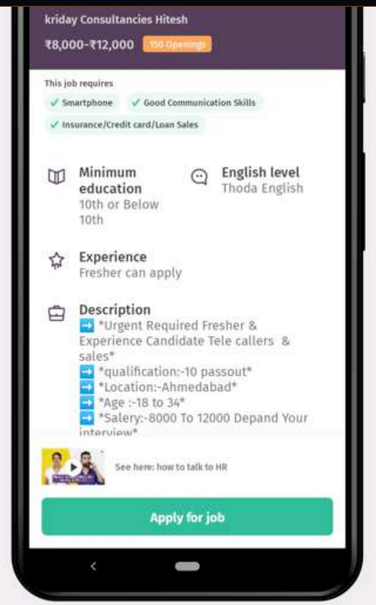

- Developed complete Android App during the inception stage of the NOW a unicorn Startup.
- • 3 Crore+ Interviews & Professional
- Search jobs by location, salary, interest, and skill
- Search jobs by location, salary, interest, and skill

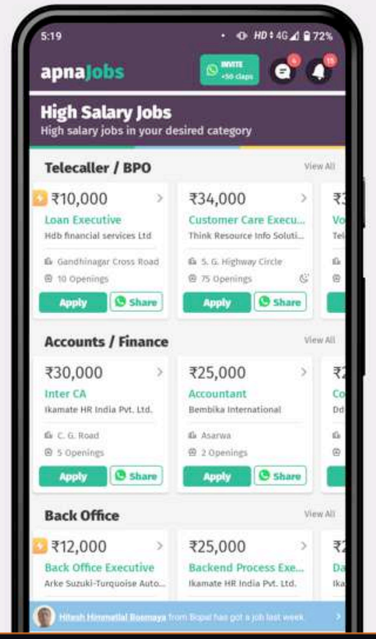

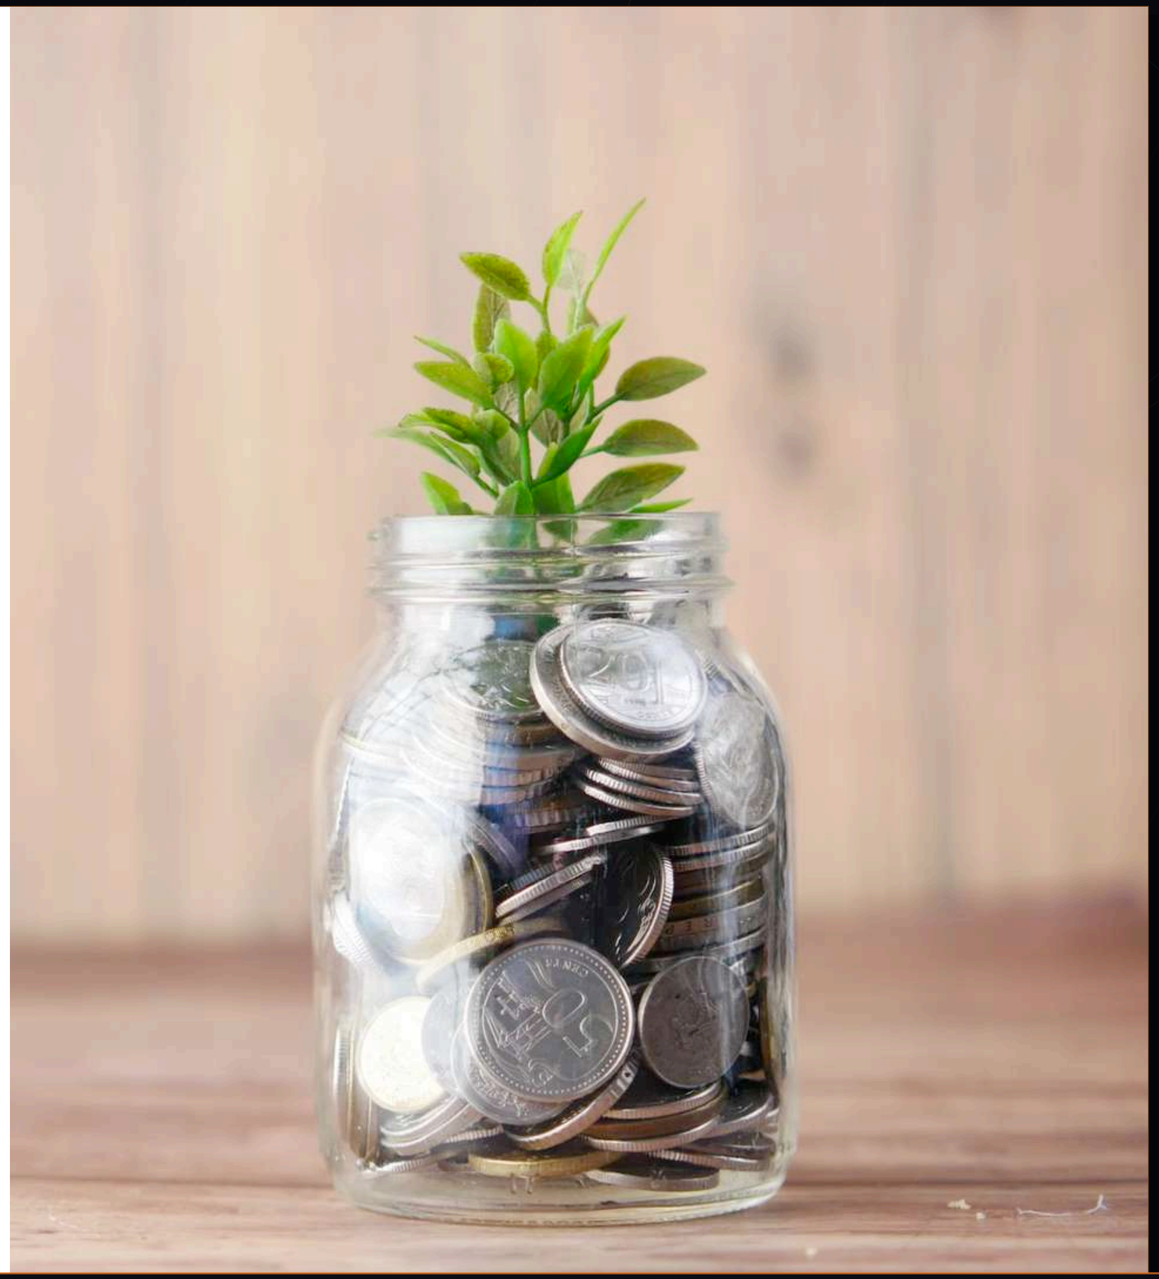

Kotak Mahindra Bank

Custom Mobile App for TASC Banking

Banking • App • .Net

The core purpose of this Android app was to minimise the tedious paperwork and to automate/ enhance interactions amongst agents, elite donors (Charitable Account Holders) and the bank itself. The aim was to establish optimum user experience and reliability through this mobile app.

- It was inevitable to build a secure login using SSL certification with two-way authentication to win their trust to bring them on the app platform.
- Leveraging custom-built APIs and integration, delivering a hassle-free app for banking agents so that they can pull user profiles in no time, instead of going through tedious paperwork to search users.
- This app-enabled them to digitally donate the interest rather than going to NGOs to save time and effort.

Monsify

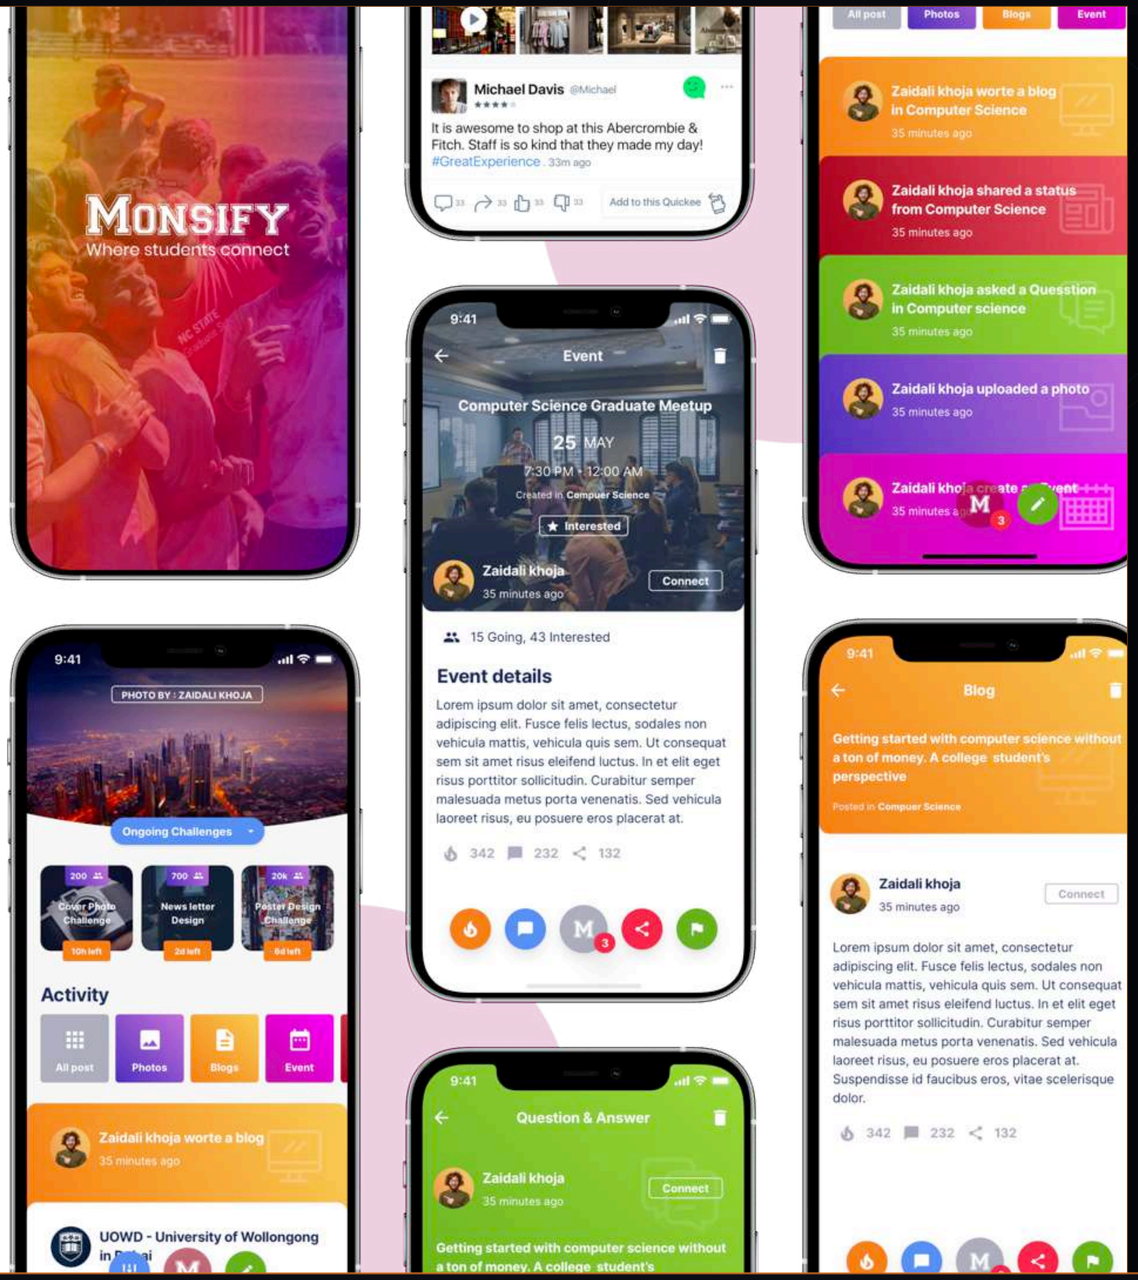

Where Students Connect

Explore universities, master your student life, and stay connected with your friends.

Education • App • iOS • Android

Monsify is a platform where students connect. Explore universities, master life, and stay connected with friends.

- A concept of community based social media application.
- It is a cross platform application wherein college and school students can connect with their respective school and college.
- There is also blog and event functionality as well. Colleges can add basic details about their courses, address, fee and other descriptions.
- Students can share photos and post over their walls and other students can see the same.

FEIS

- View Seamen registered on Application & Customers can even contact them.
- Chat with agents & negotiate on price.

Haas

Kiosk Mobility Solutions for Manufacturing Industry

Kiosk Mobility Solutions for Manufacturing Industry

Engineering • App • Android SDK

This project could be a massive opportunity for the manufacturing industry to showcase their products with the help of technology in an interactive way.

- Digital signages capture 400% more views instead of static displays. More the views, number of inquiries businesses would receive. As a consequence, enhanced customer engagement leads to greater sales.
- Having a custom app to make it work on digital signage could be a boon for businesses as it attracts customers with precise functioning, information, and specifications that drive impulse purchases.
- KIOSK based demonstration of machine specifications and pricing instead of manual paperwork and human intervention improves brand experience.

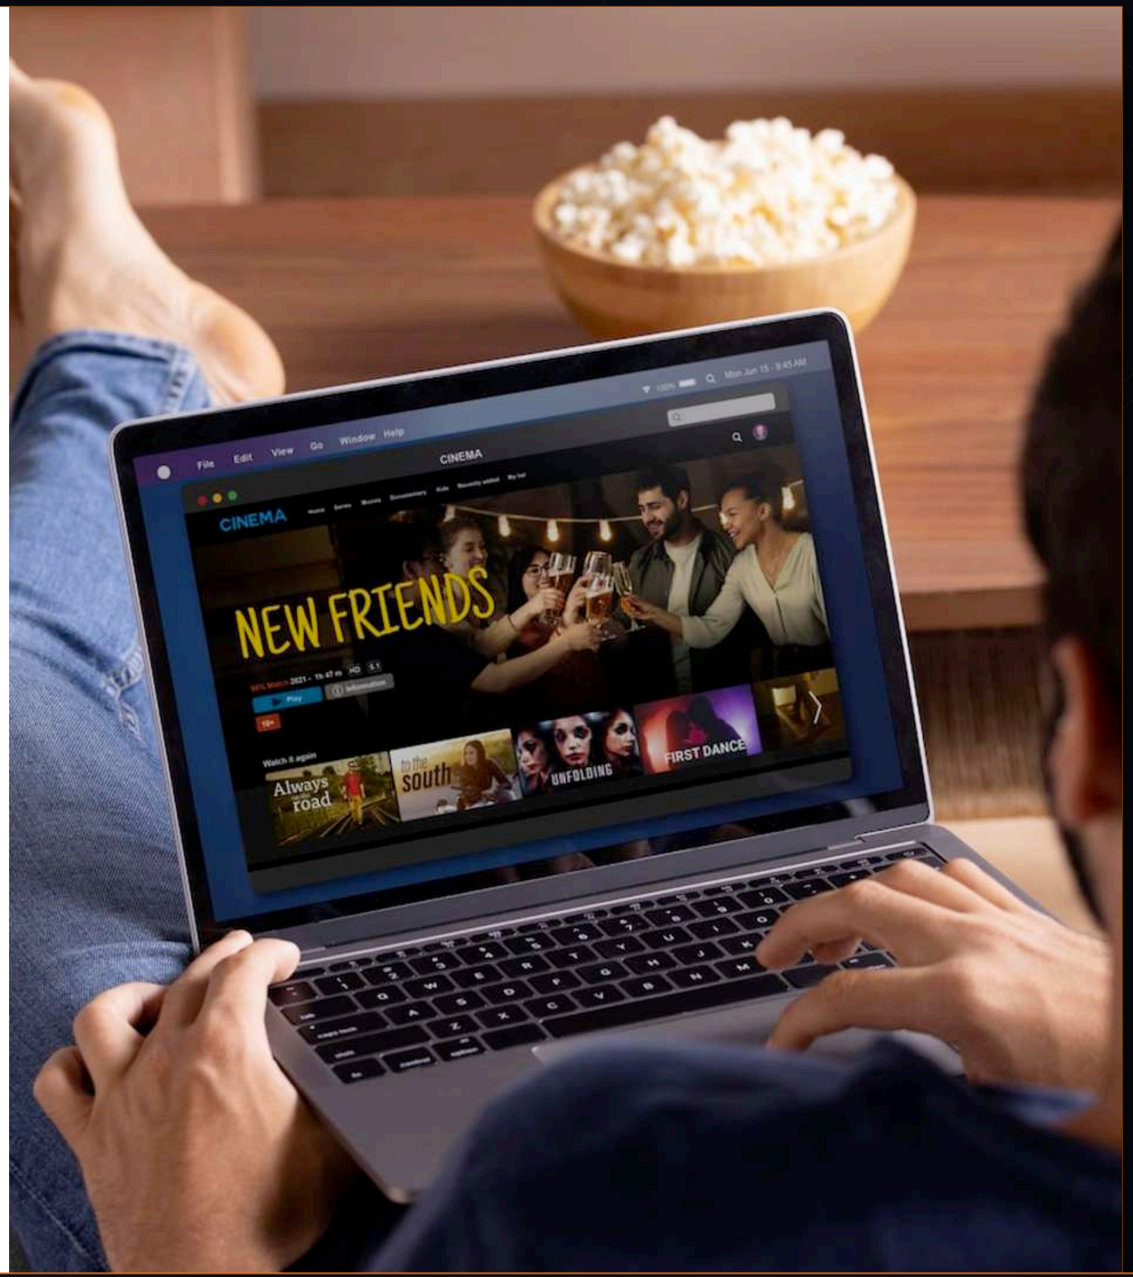

NDTV

Live movie streaming solution

Entertainment • Web • PHP

This platform is dedicated especially to foreign films that the Indian audience could view anytime, anywhere. They collaborated with Alynex A.I to make this dream come true for Foreign Film Lovers in India by creating a web platform that was one of its kind at the time.

- Bring some of the finest films from world cinema to entertain people all around the world.
- The channel is involved in hosting shows, events, and promotions, where they interview actors, actresses, and directors on insights into the film industry making it a one-point interest for thousands of viewers looking for such content all over the place.
- Often viewers would watch movies in extremely poor qualities or through a rented DVD, or even through piracy.
- Detailed information about films, ratings and reviews.

ALYNEX ARTIFICIAL INTELLIGENCE

Smithfield

Location based logistics app with tracking

Manufacturing • App • iOS + Android

A custom-built logistics mobile app can help in managing the fleet more efficiently for faster delivery operations leveraging smart route management.

- A custom-built logistics mobile app can help in managing the fleet more efficiently for faster delivery operations leveraging smart route management.
- Regular updates on loads/ packages and fast deliveries are the ingredients for enhanced customer experience in logistic industry.
- It helps in reducing the paperwork as all the data about the shipment are recorded online.
- Admin can manage drivers, track their current status from back-end applications.

Home base vendors from different places within Doha city currently. Instamall has home base individual sellers and customers.

- Customer Mobile App (Web + Mobile App)
- Vendor Portal (Web + Mobile App)
- Platform Admin Web Application

ALYNEX ARTIFICIAL INTELLIGENCE

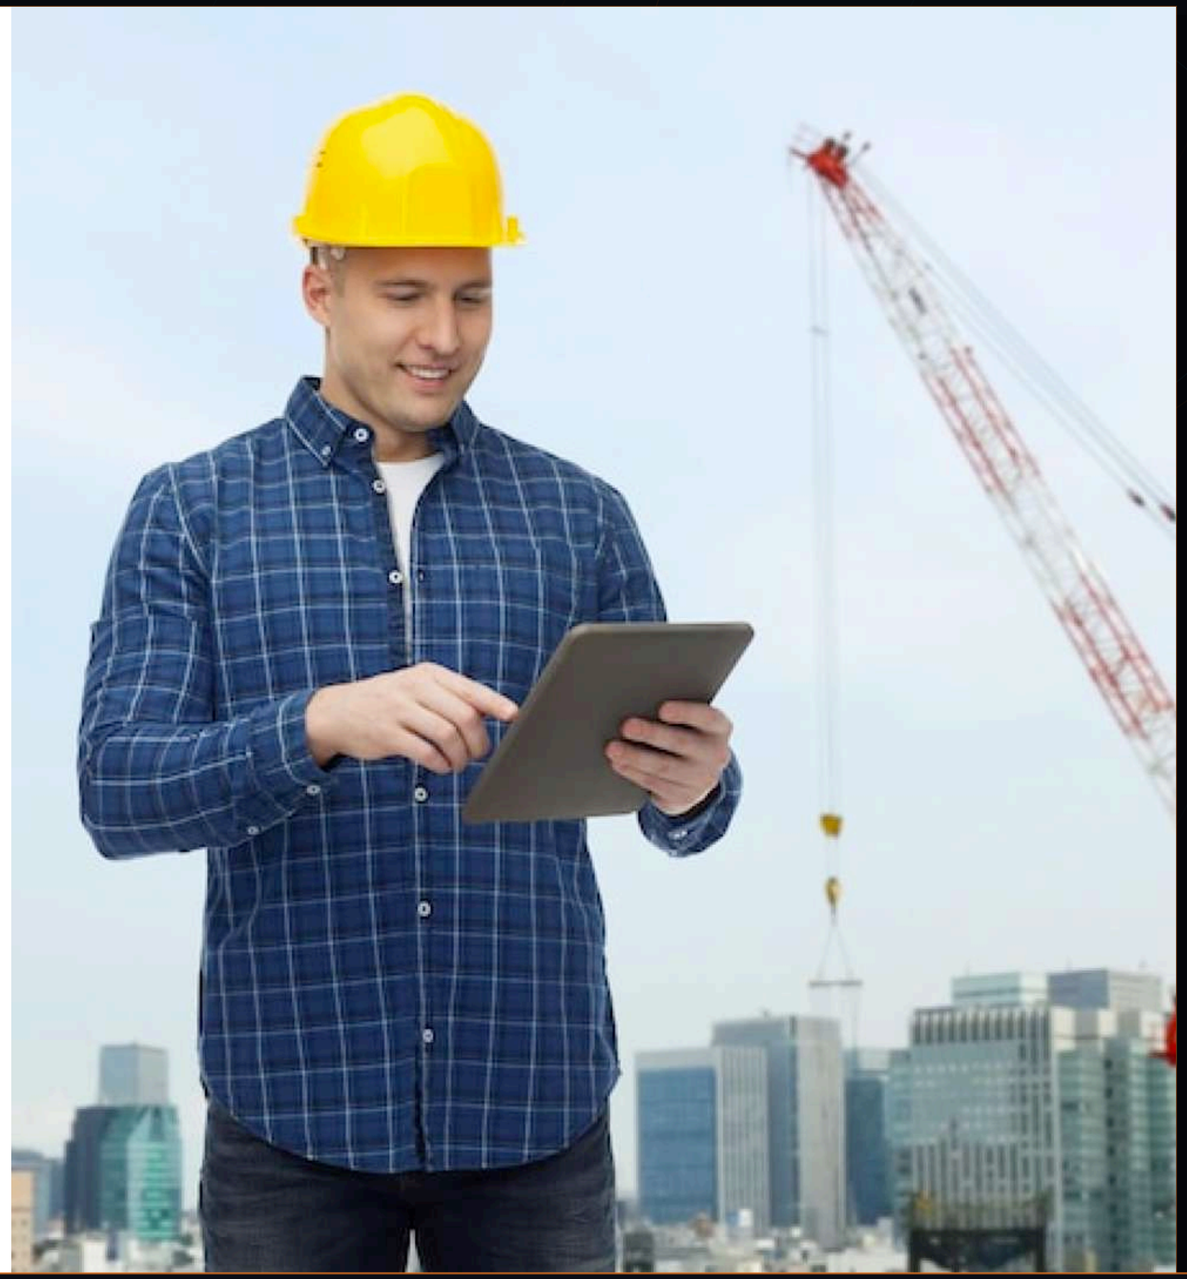

ORACLE

Created Award winning apps for Construction Management Platform

Construction • App • Flutter

Oracle Aconex, has a lot of feature teams and autonomous decisions on technology stack and wanted a partner to easily scale team at short notice to align with their multiple teams working globally to work on their Desktop, Web and Mobile Solutions.

- The mobile app enabled users to access all project data on a mobile device anytime, anywhere bridging the gap of immobility between the organization.
- Team collaboration on a greater level while moving things with the highest levels of security made possible through the app.
- An offline mode, a key feature that brought in benefits like creating and viewing offline mails and documents was an easy win to work even in remote zones where there was no internet access.

ALYNEX ARTIFICIAL INTELLIGENCE

دكان Dokkan

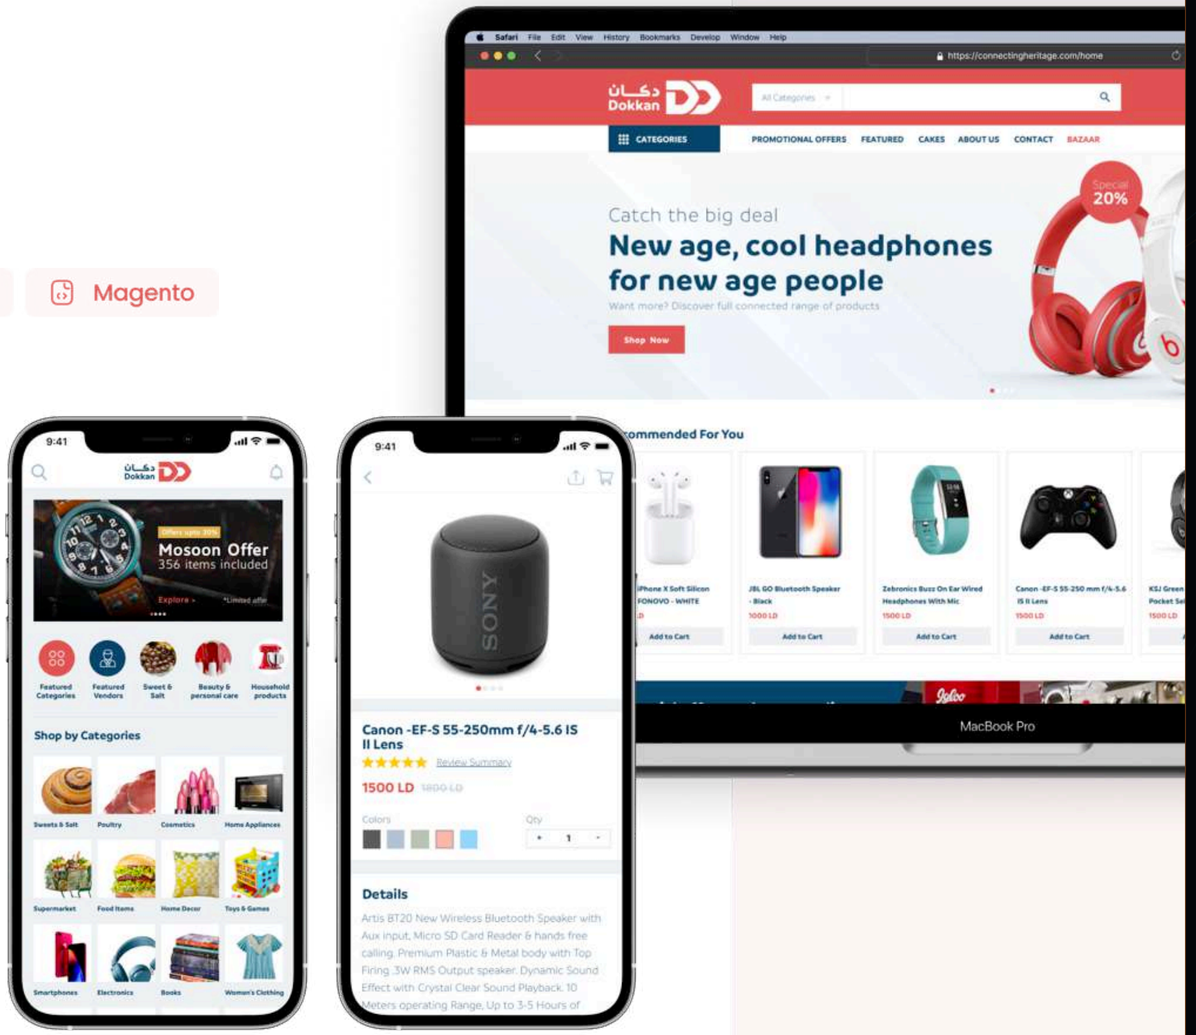

Arabic Marketplace Website & Cross platform Mobile App

E-commerce • Web • App • React Native • Magento

Dokkan is a multi-vendor marketplace, with a wide spectrum of branded products ranging from groceries, food, cosmetics, to automobile parts. It is like “You name it, they have it” kind of online shopping platform. The client had an existing website in .NET and mobile app.

Client belongs to Lybia and approached us with a need to upgrade existing .NET based MVP into the go-to platform for E-commerce need. We handled entire discovery and engineering aspect of the E-commerce platform development and migration from current version.

A multi-vendor marketplace with customers being able to order a wide spectrum of branded products ranging from groceries, food, cosmetics, to automobile parts.

ALYNEX ARTIFICIAL INTELLIGENCE

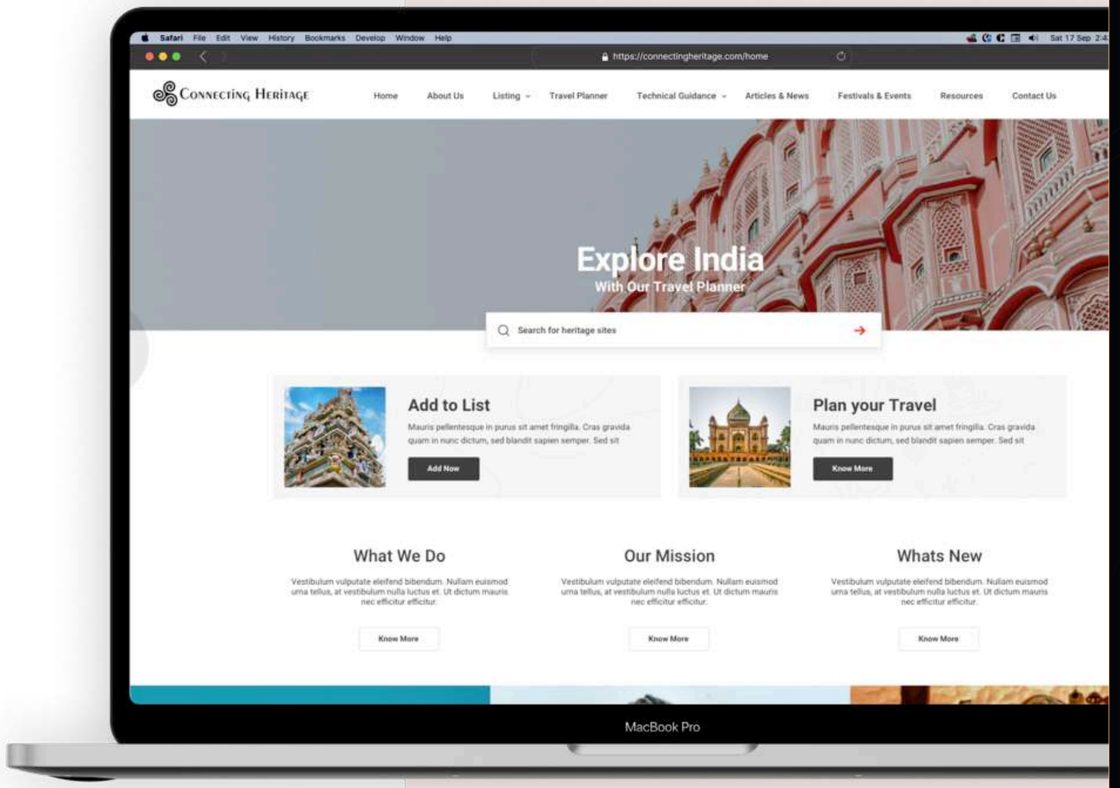

Connecting Heritage

CMS Website to List & Conserve Indian Heritage

Tourisum • Web • Laravel • Angular

The core objective was to provide a user-friendly CMS system to add and maintain a database that includes heritage sites, crafts, and traditions from all over India. The client wanted Team Alynex A.I to redesign and redevelop the website as the old version of the website was full of technical glitches and poor in terms of UI/UX and speed.

- India is losing its built heritage at an alarming rate where there are still so many monuments that are unearthed. This website platform helps to identify, list, and conserve all of them.
- A centralized platform with listings of all the heritage sites with multimedia information for reference at any time.
- Google Map integration

ALYNEX ARTIFICIAL INTELLIGENCE

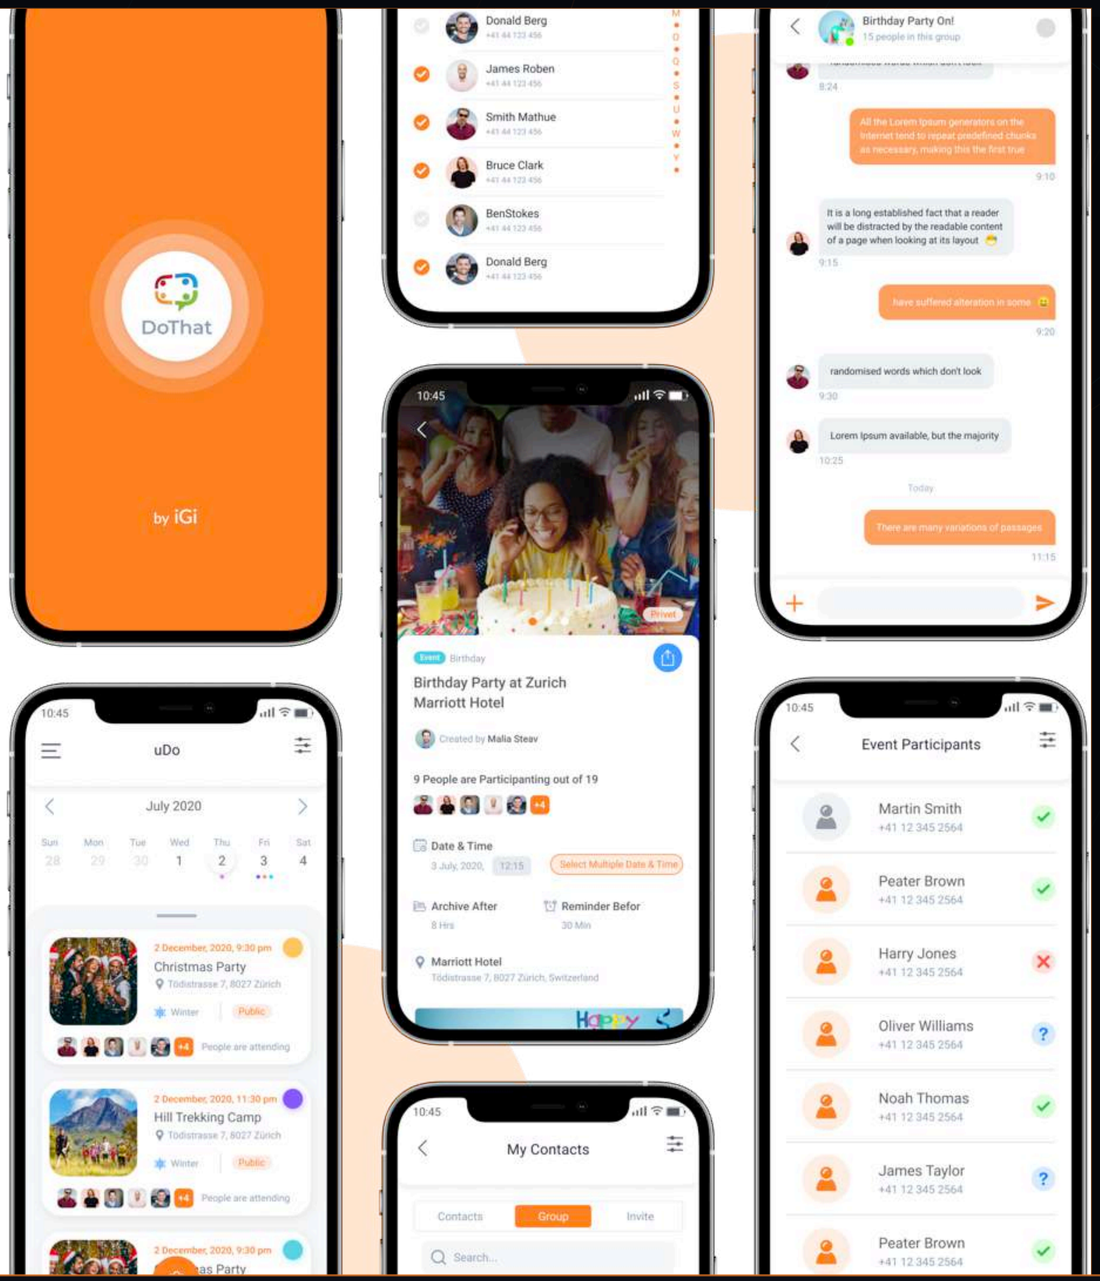

DoThat

360° leisure App to Plan & Manage Gatherings

Social Networking • App • iOS

The app allows to manage schedules, connect with contacts, explore activities , plan gatherings, sync calendars for notifications & share the moments via chat module in real time.

- It ensures user retention as using one app to manage all your leisure activities saves time & enhances overall user experience.
- Easily create, schedule, share to the network & get its reminders regularly.
- Events are shared to the contacts with additional details like participant's availability decided by the calendar, weather updates, deep linking for event sharing & navigational assist to guide people to the venues.
- The advanced chat module could be created for individuals or a group attending a specific event.

ALYNEX ARTIFICIAL INTELLIGENCE

BOOKMYTAXI

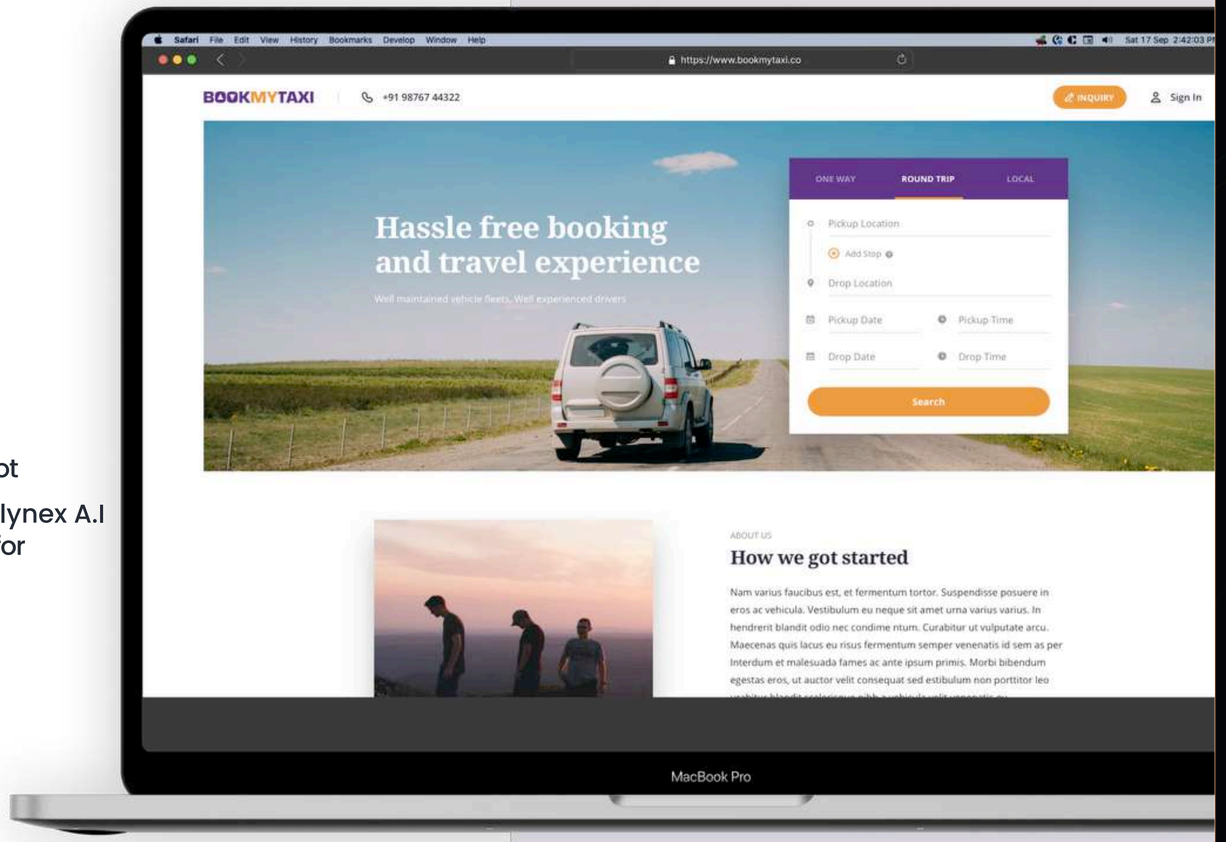

Book your preferred taxi Across Major cities in India

Transportation • Web • Laravel

Bookmytaxi was an offline taxi booking service available in the city of Ahmedabad. With growing demand for online taxi rentals, the clients had one vision for his business.

They wanted to go digital and have an online portal for their clients not just in Ahmedabad, but across the country. They approached Alynex A.I to design a platform that would be modern, friendly and easy to use for both the drivers and riders.

- These drivers could be anyone so it was crucial to provide the right information at the right time.
- We kept the screens minimal with only information that was important so that the drivers can complete their tasks with the least amount of effort.

Daily Deals

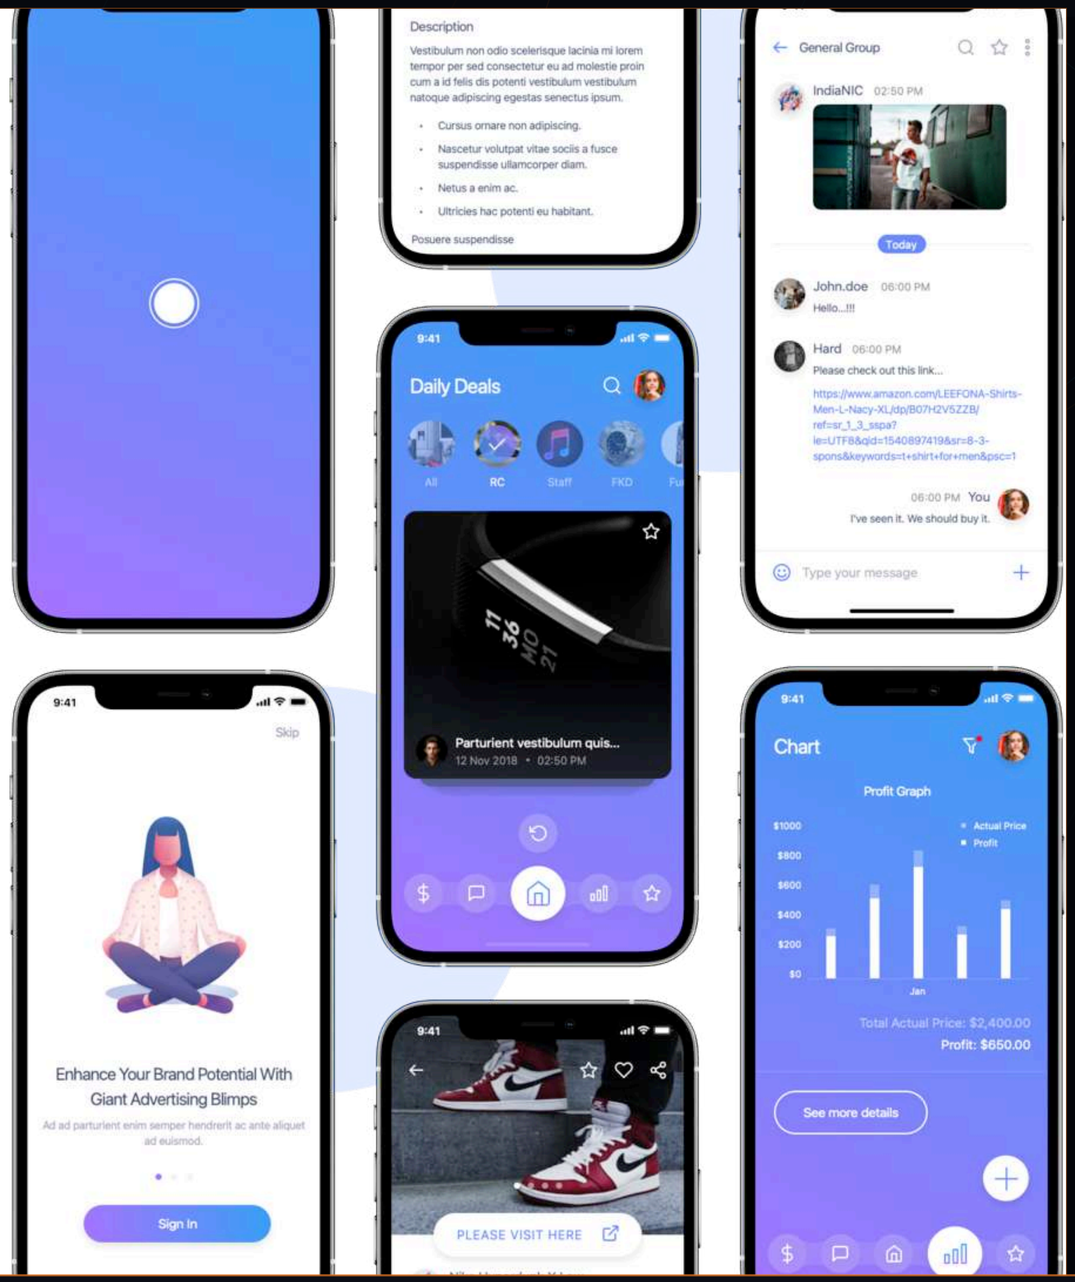

UI/UX Design for a Daily Deals app

UI/UX Design for a daily deals

Deals • App • iOS

Deals App is a brainchild of two college students who often looked out for savings deals on an array of products from different industries. They wanted to create an app where they could help users benefit from the best deals available on their favourite products.

- Create user profile and add interests of specific industry deals.
- View collection of deals & the details regarding new deals available.
- Filter out the deals based on the available categories.
- Users can also bookmark deals, which can be viewed from Bookmark tab.
- In the detail of each deal user can see the collection of images, deal description and comments added by the other users of the application.

upraise

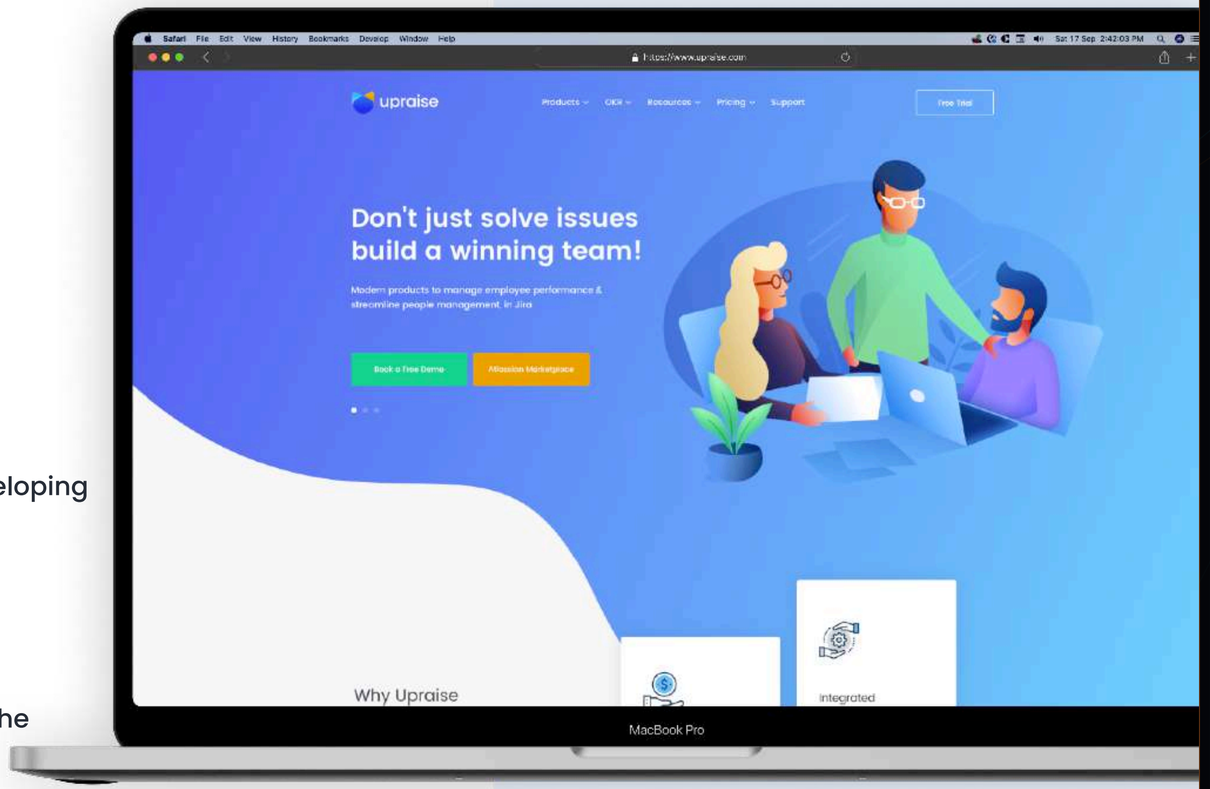

Defining UX and UI for upcoming OKR platform

Corporate • Web • Wordpress

Upraise is a modern product to manage employee performance & streamline people management all in one place. It's all of Core HR, integrated with project management to simplify tedious business processes.

While Alynex A.I has been handed the task of designing and developing a highly functional and intuitive final product, this case study emphasises on the attractive UI design we created for their marketing website.

- Viewers are quick to judge a product based on the way it looks
- At Alynex A.I, we emphasis strongly on psychology design and the process of visual communication for problem solving using typography, photography and illustration.

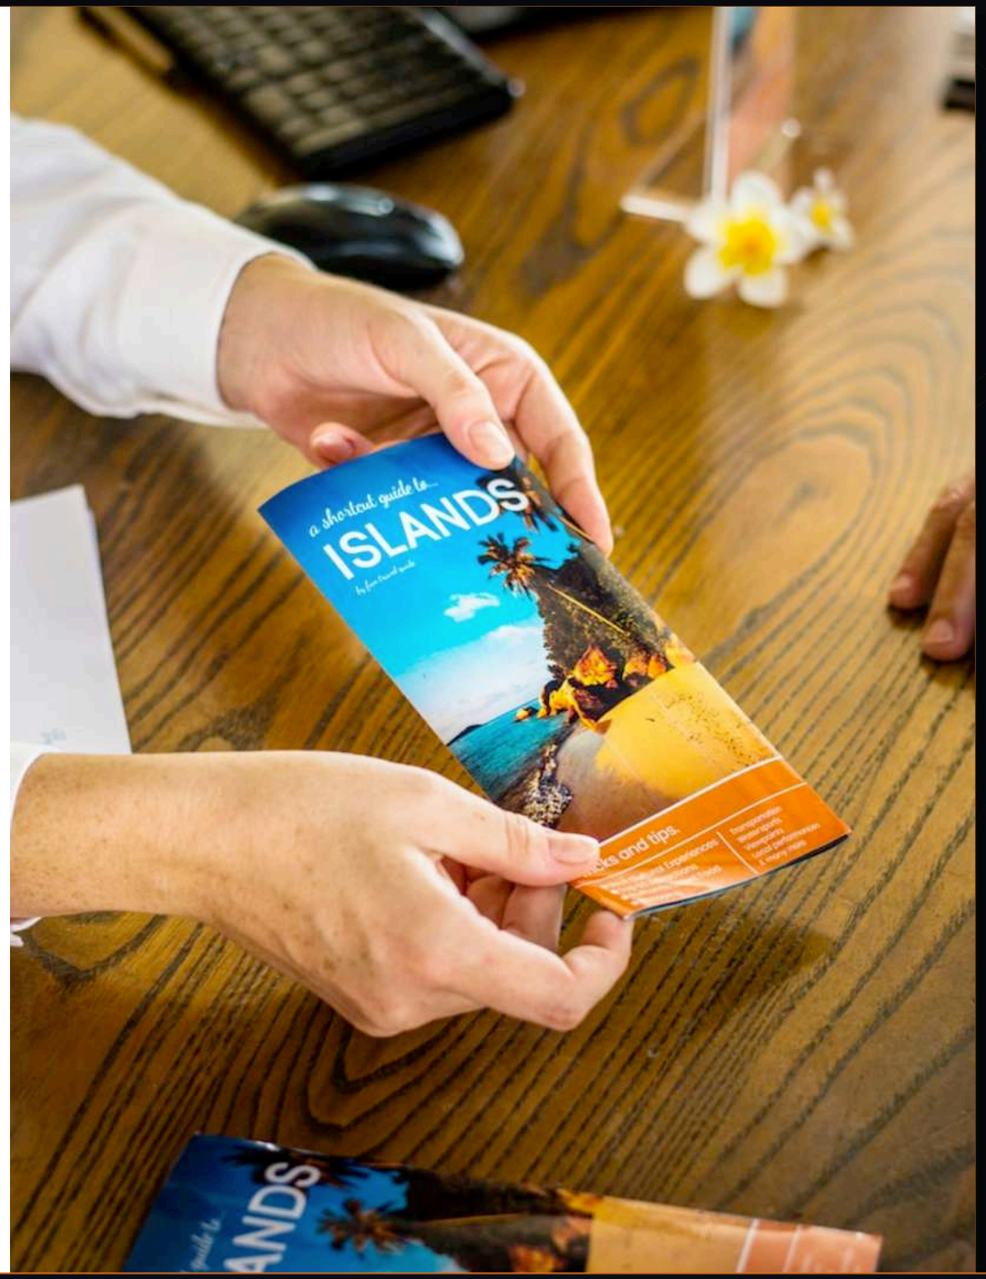

life technologies™

Digital catalogue app for sales representatives

Marketing • App • Android • IOS

Life Technologies is a leading biotech company providing the most innovative products and services to esteemed customers in the fields of scientific research. To support scientists, Life Tech offers high-end solutions ranging from everyday essentials to instruments, for every lab and relevant applications. The client approached Alynex A.I in search of a digitised solution for the sales team to market their products efficiently to their customers.

- Digital catalog app solution not only saves businesses from recurring printing costs but also empowers them to increase online visibility and outreach.
- The app keeps all the data safe and secured in order to analyze it at a later time for future insights.
- Customers can download the PDF for a relevant product with all the information and share it with others instantly while providing offline access to the downloaded PDFs.

ALYNEX ARTIFICIAL INTELLIGENCE

iFornelli

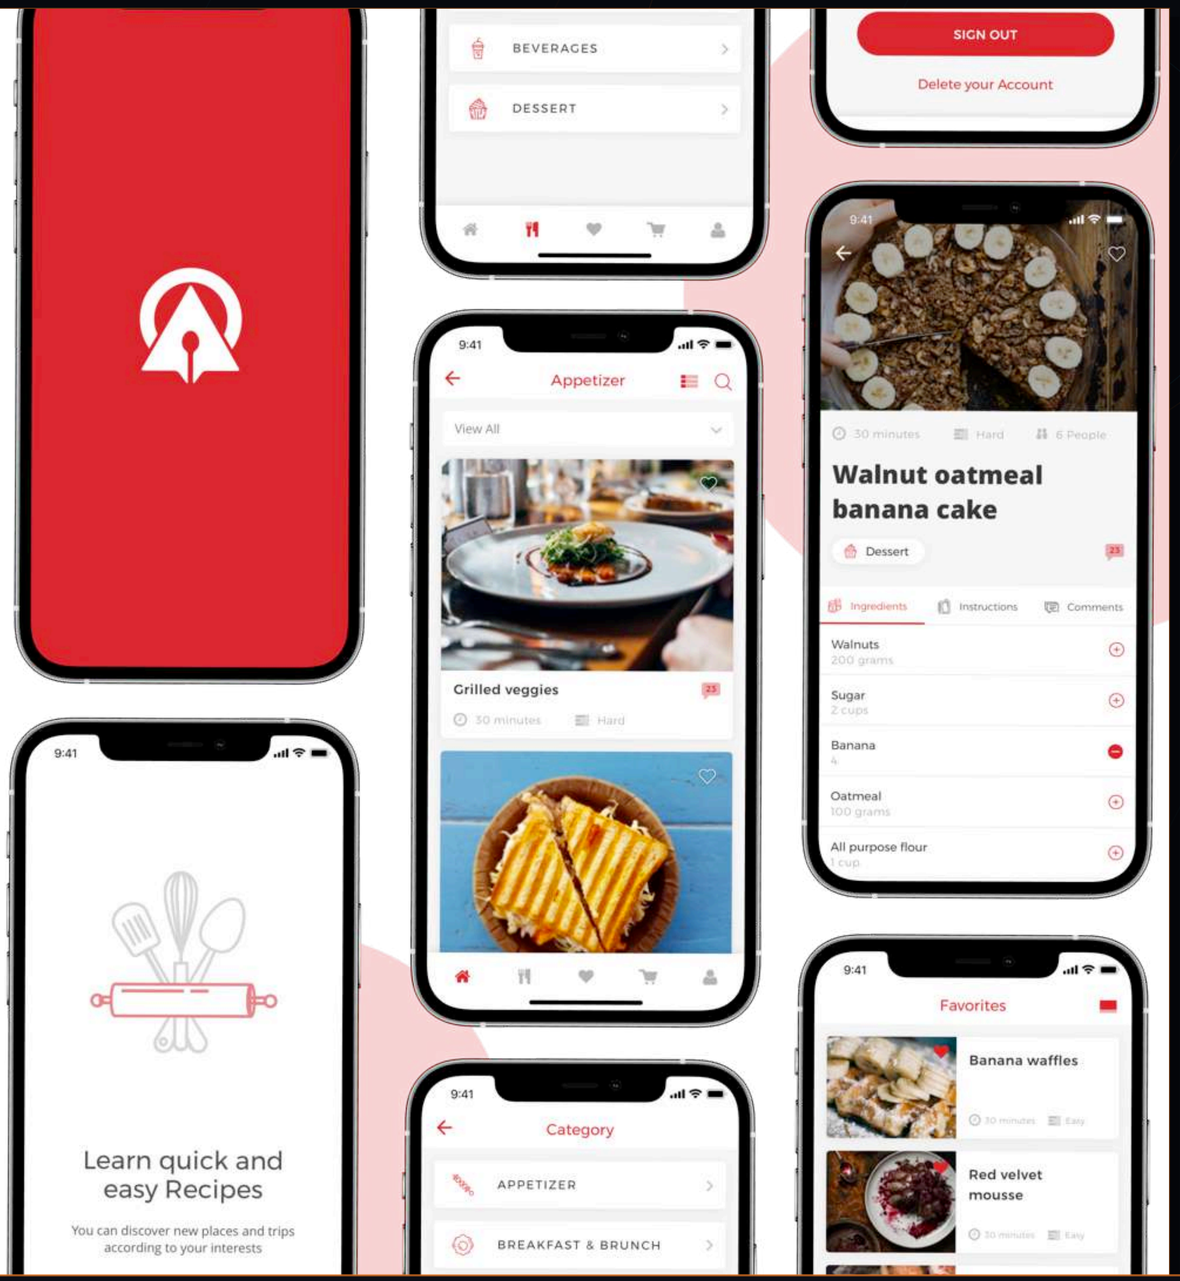

Learn Quick and Easy Recipes

Categories wise discovery of recipes

Food • App • iOS • Android

The Recipe App was designed to not only let users discover new recipes but also select from various categories, and filters for a more personalised experience. Users could add ingredients of their choice and the app will come up with a recipe for those specific ingredients.

- To learn quick & easy recipes, users could select from different categories available on the app.
- Whether it was a breakfast recipe or simply a dessert or soup.
- We designed various icons to go with the theme so that users can quickly get the information they are looking for.

GO FRESH

An online grocery ordering and delivery platform in Peru.

E-commerce • Web • Magento

Changing the overall experience of running the errands digitally for the people of Peru. Alynex A.I helped an already popular online grocery business called Gofresh to revamp their Spanish language E-commerce website to order, purchase, and deliver fresh groceries. It was also necessary to bring stability to handle a larger customer base.

- Made for : Vendors, Buyers
- Catalog Experience and Product Browsing
- Seamless checkout with multiple payment options
- Customer Account and management features
- Complete deployment and maintenance post launch

ALYNEX ARTIFICIAL INTELLIGENCE

Sparker

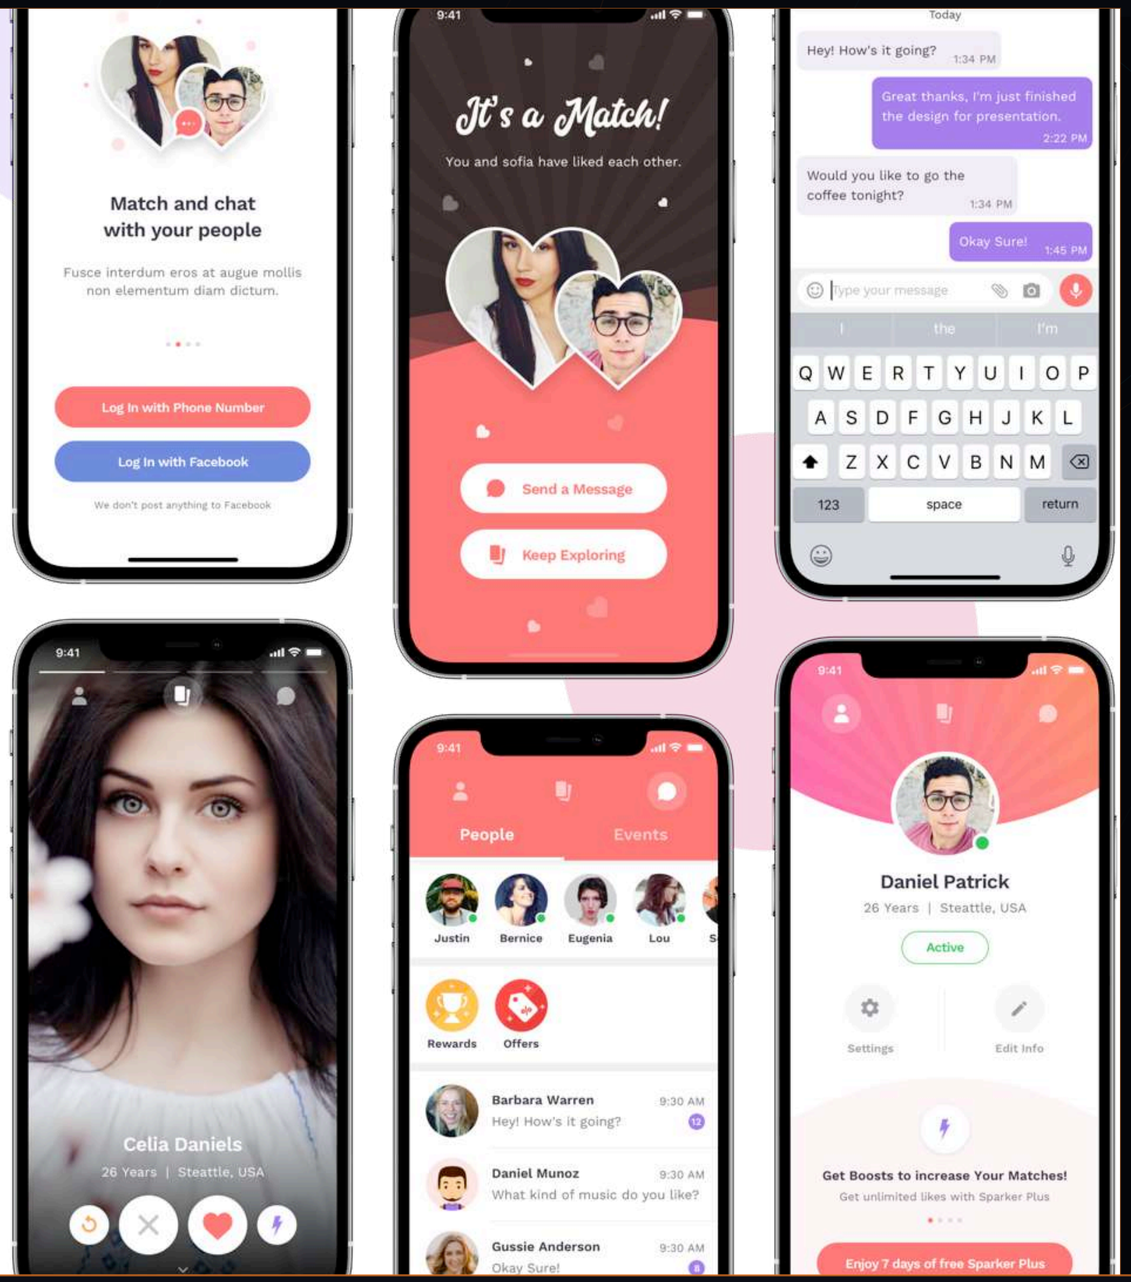

Match Making app

Designing a platform that goes beyond just a dating app

Match Making • App • iOS • Android

Sparker is an app that lets people discover and meet interesting people nearby. It goes beyond just a chatting platform as it lets potential matches benefit from restaurant rewards and event informations, if they'd like to meet.

- Discover interesting people near you
- Match and chat with the people
- Find events nearby and meet people
- Get rewards when you meet your dates
- View events nearby

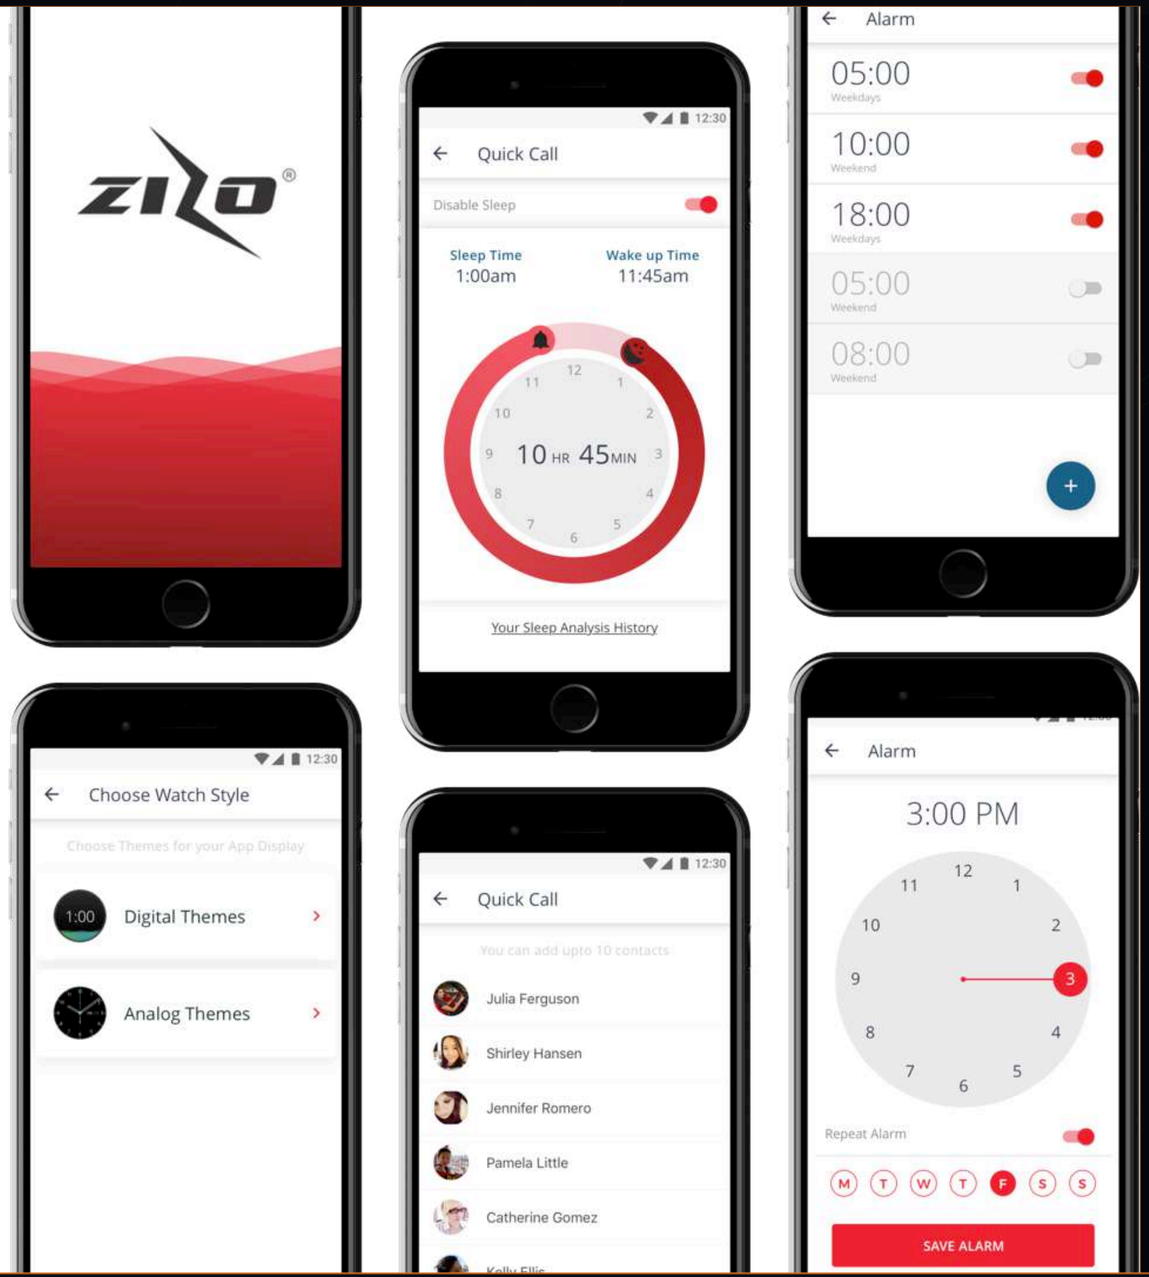

ZIKO®

Easily access information from your phone on a smart case widget

Utility • App • Andriod

Ztyme is a smart case designed specially for Android phones. It's not just any phone case but rather a very sophisticated one which becomes a widget where you can select the information you want to view, without opening your phone. Our task was to design an intuitive Ztyme app as well as the Widget screens and make it fully functional with a seamless performance.

- There was also an option to enable and disable the widget.
- Easy customization of the services available on the widget.
- Watch style- A digital theme and an analog theme
- We even gave the option to customize the "quick call" list as per the users preference.

ALYNEX ARTIFICIAL INTELLIGENCE

RIMAC Seguros

Predictive auto insurance via smart devices

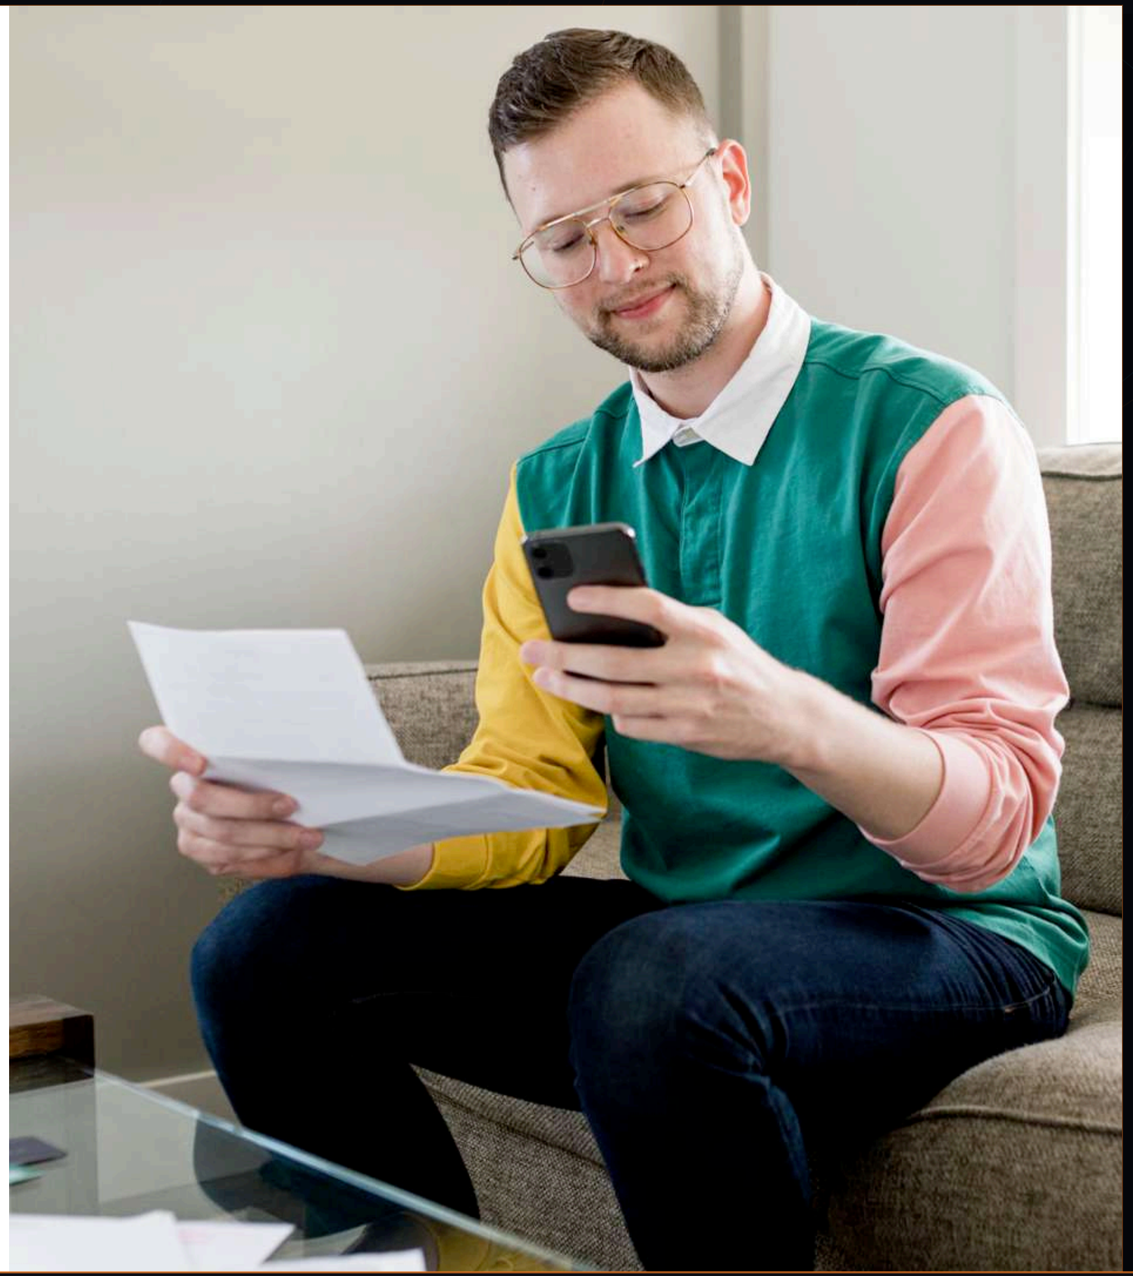

Marketing • App • iOS • Andriod

Rimac, an insurance company contacted Alynex A.I to create a Driving Based Insurance premium solution that would study the driving patterns of the driver and record their driving potential.

The data collected would be useful to the insurance company who can then calculate the premium users need to pay based on their driving patterns.

The insurance company could also identify, differentiate and reward “safe” drivers, by offering them lower premiums to appreciate the safe driving behaviour, hence attracting a larger customer base.

The solution also offered insights to users about savings tips to lower their premium and help them take steps for better driving.

Spot Jobs

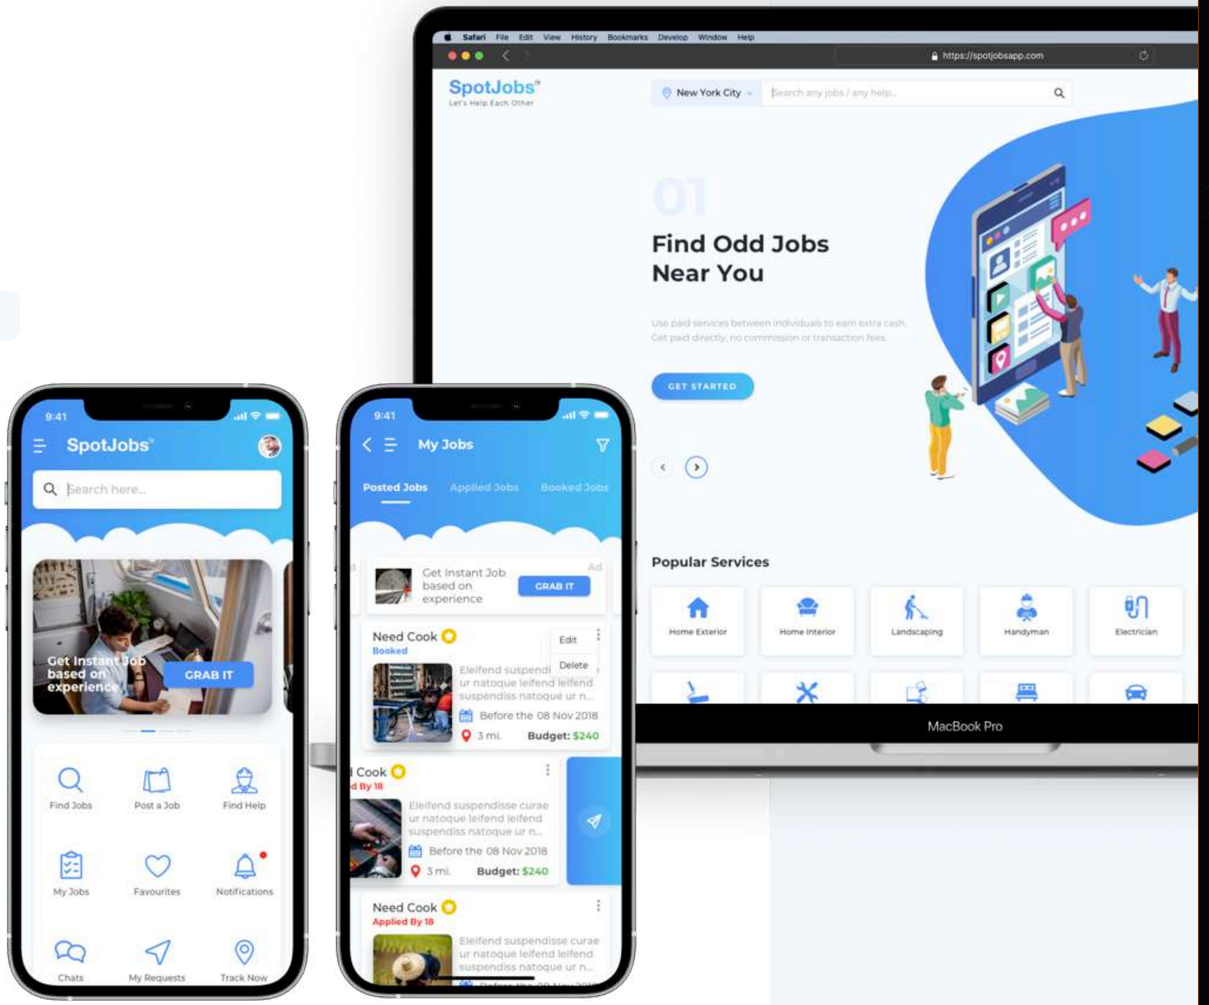

Search job & Service

Simplifying your everyday job search and service hunt

Recruitment • Web • App • React Native

The vision was to bring different people together, ones who offer services and the ones who seek them, by making it easy to pinpoint everyday tasks or services in local communities. The foundation of the idea being “by helping each other, we can call benefit”.

- Service listing
- Filter by address
- Detailed map listing
- Real time tracking
- Built-in chat & message requests

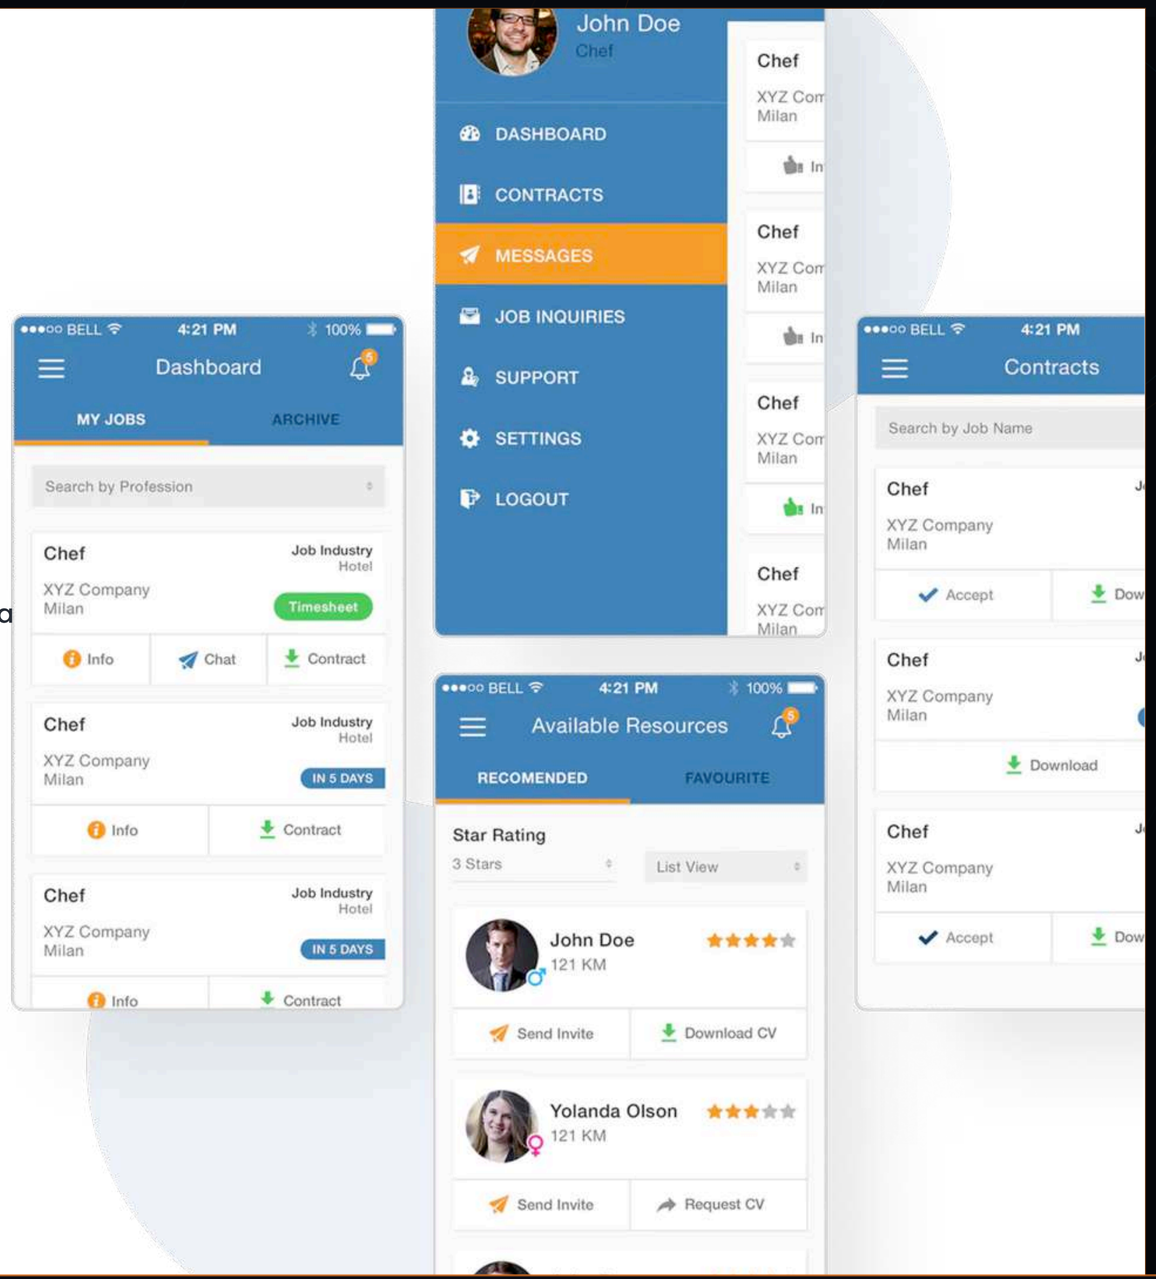

LAVOROLIVE
il lavoro che ti cerca

Recruitment portal powered with App for job seekers

Recruitment • App • iOS • Android

The client is a leading Italian commission-based recruiter firm or a job placement service provider. The client outsourced the project dedicated to job seekers and job providers to Alynex A.I. Idea Lavoro, a dynamic website and customized apps for both iOS and Android platforms. Both job seekers and employers of Italy are the target audience for this project.

- Jobseekers & employers
- A robust web portal along with a strong admin panel facilitated the client to track and manage activities of job seekers and employers.
- The client could access the real-time data and the users could readily manage their tasks.

SalamMe

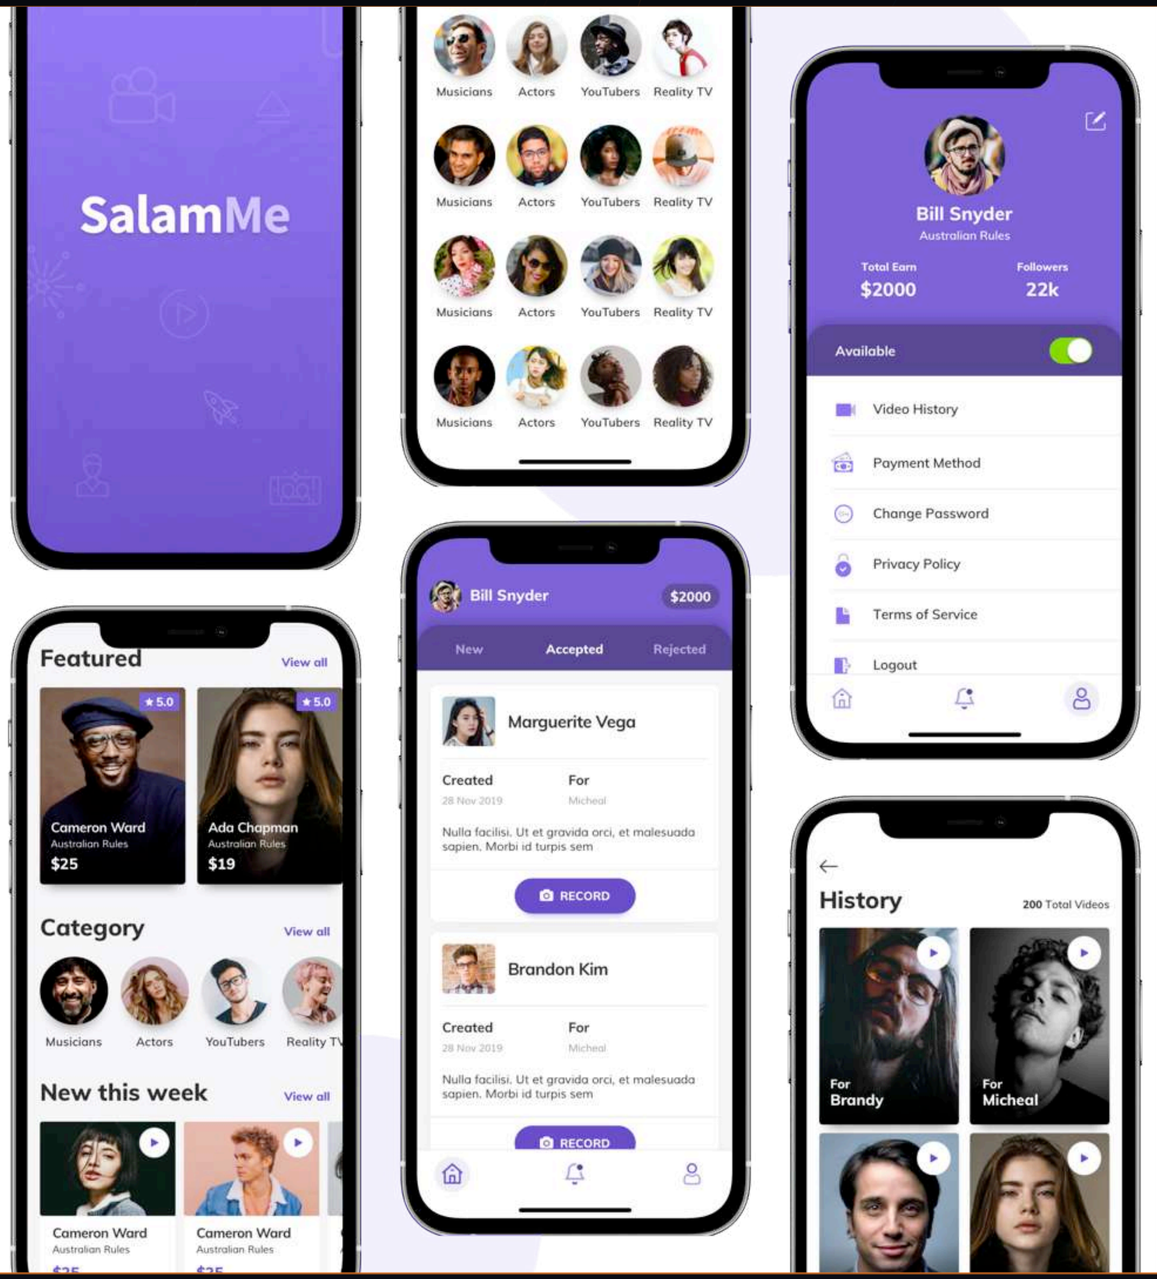

Video Shoutout

A shot at creating more than a "Cameo"

Content Making • App • iOS • Android

Create a cameo alternative with more personalised approach to connect creators, talent and celebrities to their fans.

- We engaged in a discovery workshop with client to come up with intuitive UI and engineering plan to develop iOS and Android App with Flutter.
- Whether it's wishing your sibling a happy birthday, or roasting a friend after a close fantasy football matchup, Salamme lets thousands of amazing, talented people deliver your message.
- Also users of the app can browse videos from different categories of artists such as musicians, actors, tv stars, youtubers and a lot more.

Aradah

Application to sell Pre-Owned Vehicles

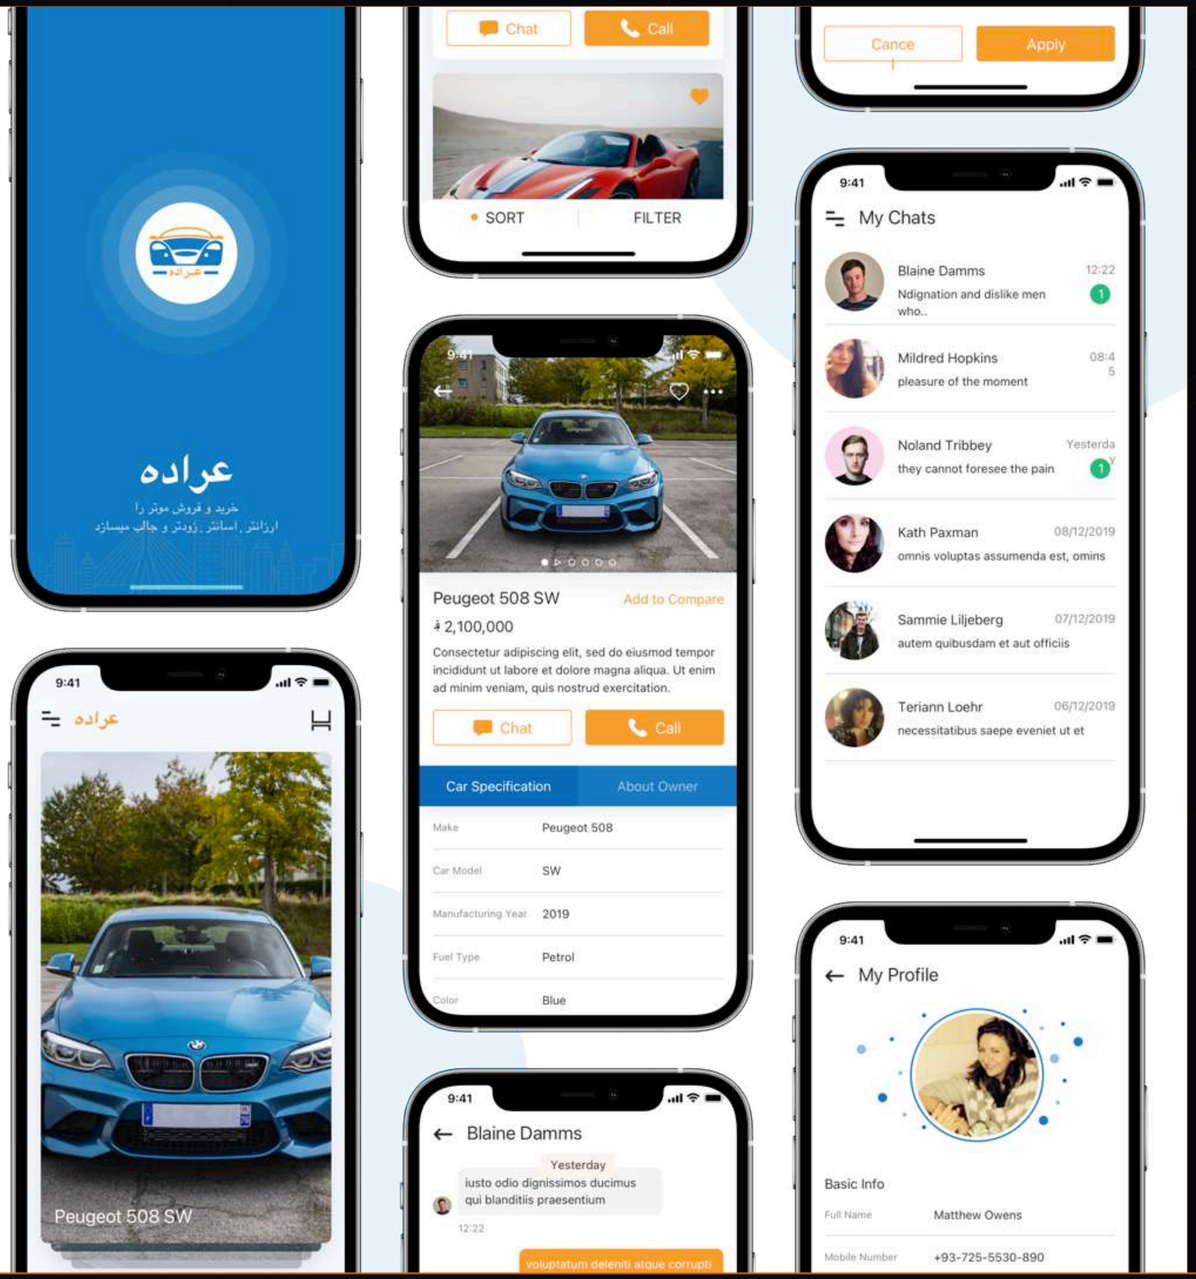

Application to sell pre-owned vehicles

Automobile • App • iOS • Android

Users can share the details about the car and put the amount with the preference country. Users need to recharge their accounts in order to post ads in the application. Users can filter the cars by the preferences of Brand of the car, Fuel Type, Color, Price, and Country.

Aradah is an online application designed to facilitate business deals between interested parties in the automobile industry. This state-of-the-art technological platform enables individuals and businesses in the preowned car sale sector to engage in business.

- Post the Ad
- Filter the Ads

Enterprise mobility for telecommunication industry

Telecommunication • Web • Java

MTN, being the eight largest mobile network operator in the world has over 24 million subscribers, was looking to upgrade the billing ecosystem. The client also wanted to redesign the user interface to ensure optimum user experience using the trending technologies. The idea was to implement an efficient enterprise-grade solution to streamline the process of invoice generation and billing management. Team Alynex A.I provided a complete solution that met custom needs of MTN group perfectly with ZERO downtime.

- To implement a simplified billing process, Alynex A.I designed billing APIs with a single point of entry for all billing information using existing MTN systems. Having Custom APIs (instead of Oracle APIs) allowed MTN to use them extensively throughout the enterprise.
- Leveraging Microservices based architecture benefits an enterprise to implement and deploy loose coupled service applications without being dependent over the other systems.

Mobile App for Visa Facilitation Services (VFS)

Travel • App • iOS • Android

Along with tracking status of Visa application, the app required feature where users can make payment online along with booking appointments for interviews. The idea was to provide a complete digital solution that can enhance the user experience and streamlines the tedious process through a unique platform with all the visa relevant information which a user needs.

- End-to-end hands-on information for interested Visa applicants about any visa-related question leveraging mobile app development allows users to access and share information instantly.
- Important information about VFS branches and operations.This really helps in avoiding false visits to the VFS offices.
- User reviews and feedback can help VFS to analyze and kickstart working on the areas of improvement.
- Created apps for 40+ mission apps, one each for a mission country VFS operates for.

Seamless Marchandise

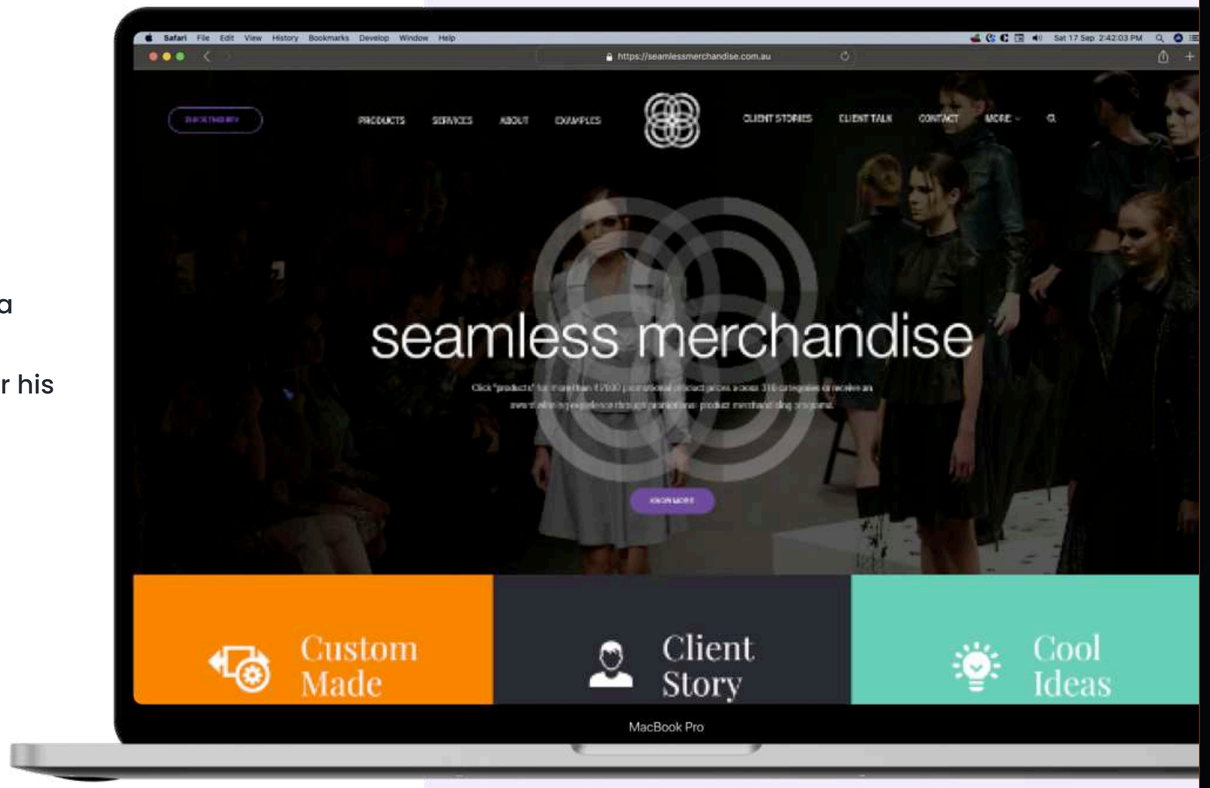

Redesigning to generate more leads
for promotional products

Promotional Products australia

Marketing • web • Laravel

Seamless Merchandise is an Australian company dealing in promotional products and corporate catalogue programs. They have a wide range of customisable product options available at the click of a button. The client came back to Alynex A.I with a futuristic plan for his business and wanted to get an increased number of inquiries on his website to grow the business even more.

- Product Design (In House)
- Product Branding (In House)
- Product Marketing (In House)
- Product Warehousing (In House)
- Product Distribution (National & International)
- Product E-commerce Websites (In House)

Seamless Marchandise

Social Networking

Printing service WhatsApp chat into Customised book

Social networking • Web • Laravel

The client offers book printing services through converting WhatsApp chat into a customised book. While making both the soft copy (eBook) and hard copy, the client facilitates the customers to edit or modify WhatsApp chats or WhatsApp history.

- Alynex A.I integrated 'Chat Editor' in the website enabling the client to offer online chat addition and modification facility to the customers.
- A shopping module with desired features was implemented by the experts at Alynex A.I while developing an e-commerce website for the client.

NextG

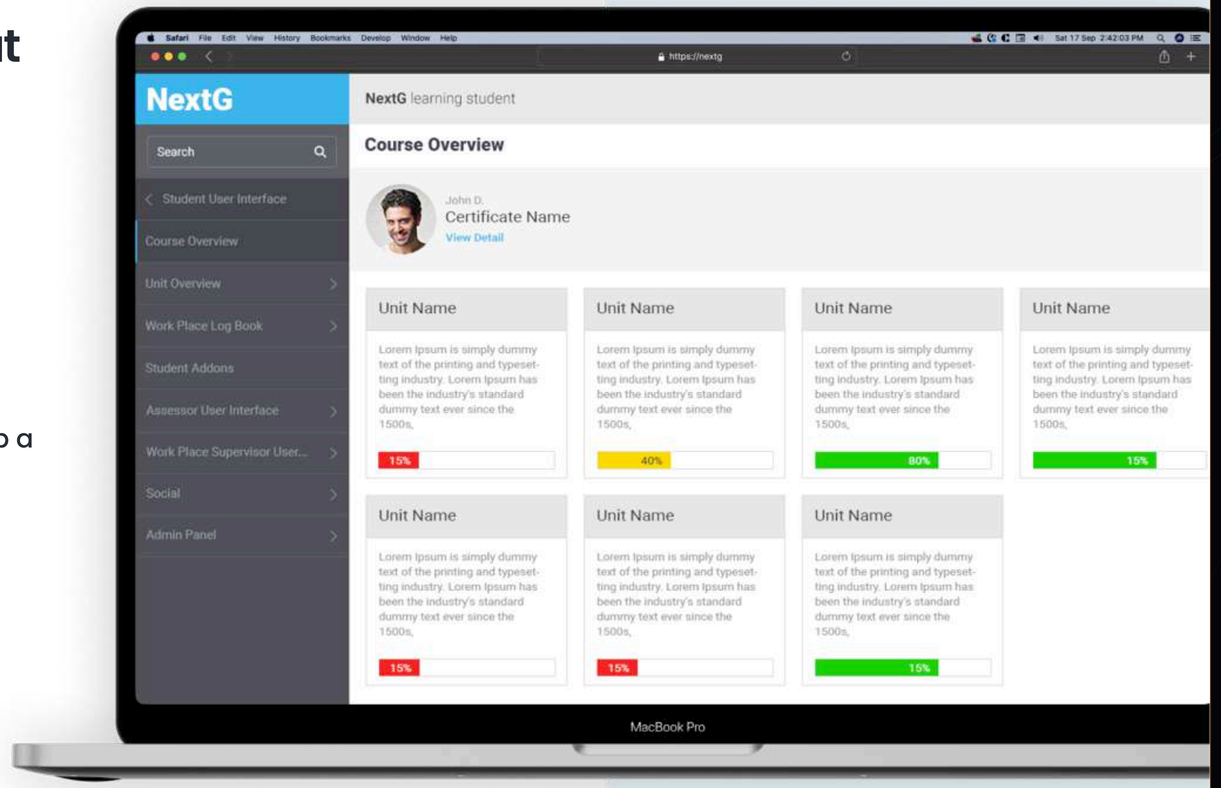

A web Platform in education Sector that manages courses and students data

E-learning • Web • NodeJs • Angular

Our client is an academic establishment that wanted to create a web platform for the education sector to manage all students and courses in an organized tradition.

The primary objective of Alynex A.I for this project was to develop a SAAS based web platform, that would be then rolled out to its different users. We successfully took on the initiative and went on to design and develop a really useful product for the education sector.

- Next G Learning Student
- Workplace Logbook, Course Structure, Course Material, Assessments, Class Information and many more features student learning.

cykelkraft

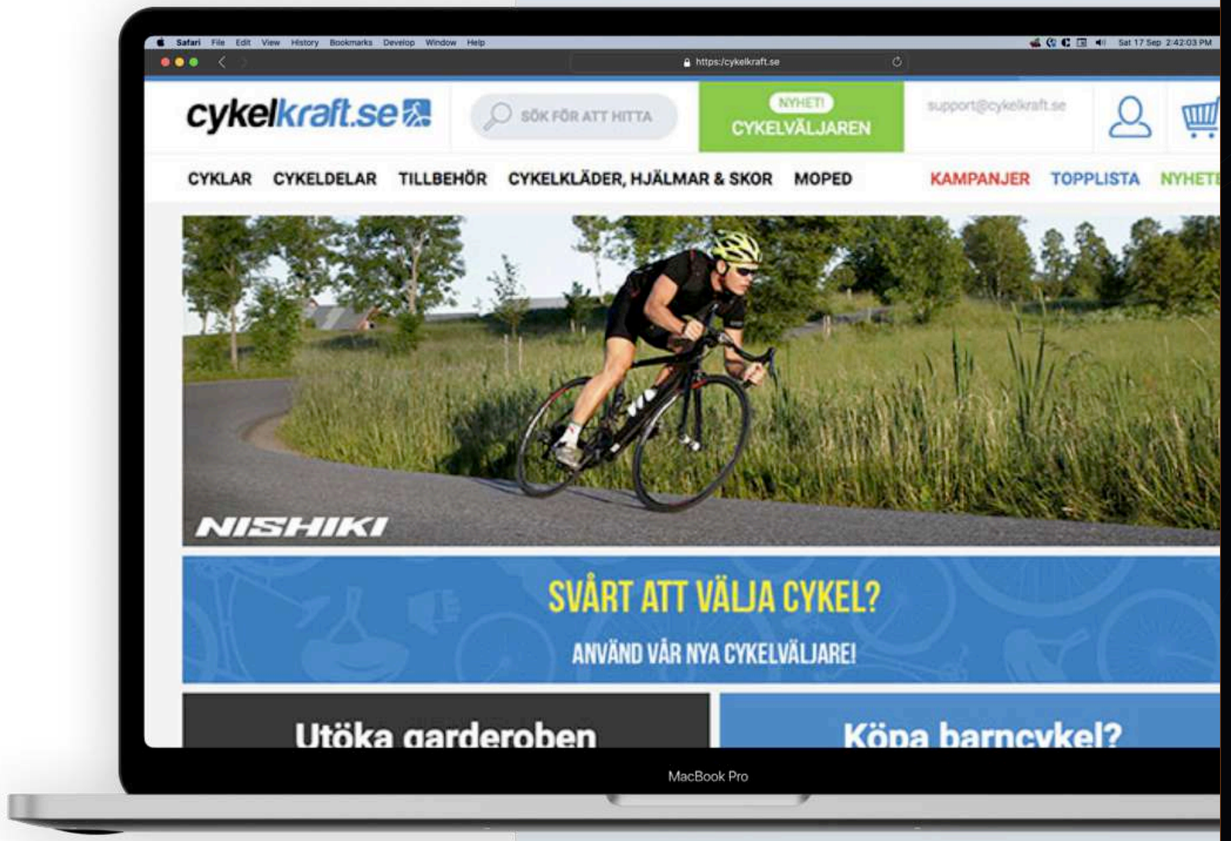

Keep healthy, ride every day

E-commerce • Web • Magento

CykelKraft.se is an online shop that offers an end-to-end solution for purchasing bikes in Sweden. It has included varieties of supplementary products including accessories and health drinks for the avid bikers.

Alynex A.I suggested an ERP integration with an online store for managing inventory and other business processes. As a technology freak, the client has adequate technical knowledge, but he was unaware of online marketing, SEO, and other eCommerce-related tactics. Location-based SEO services and product-feed promotion were offered by marketing experts at Alynex A.I to serve the client's purpose.

- Facility to purchase energy drink online
- Category of bikes and accessories
- An online insurance buying facility

ENERGYM®

The app is designed to connect with smart fitness equipment

Fitness • App • Flutter • Firebase

The Energym App is a fitness application created using Flutter, a cross-platform technology. It utilises the Internet of Things (IoT) concept, allowing it to connect with smart fitness equipment like a smart treadmill and workout bike. These devices are equipped with Bluetooth capabilities, enabling seamless communication with the app. The app provides users with a range of fitness-related features and functionalities, making it convenient and efficient for tracking and improving their workout routines.

- Bluetooth connectivity with smart fitness equipment.
- Tracking of workout metrics such as distance, speed, and calories burned.
- Real-time data synchronisation between the app and equipment.
- Customisable workout programs and virtual coaching.

Pompah

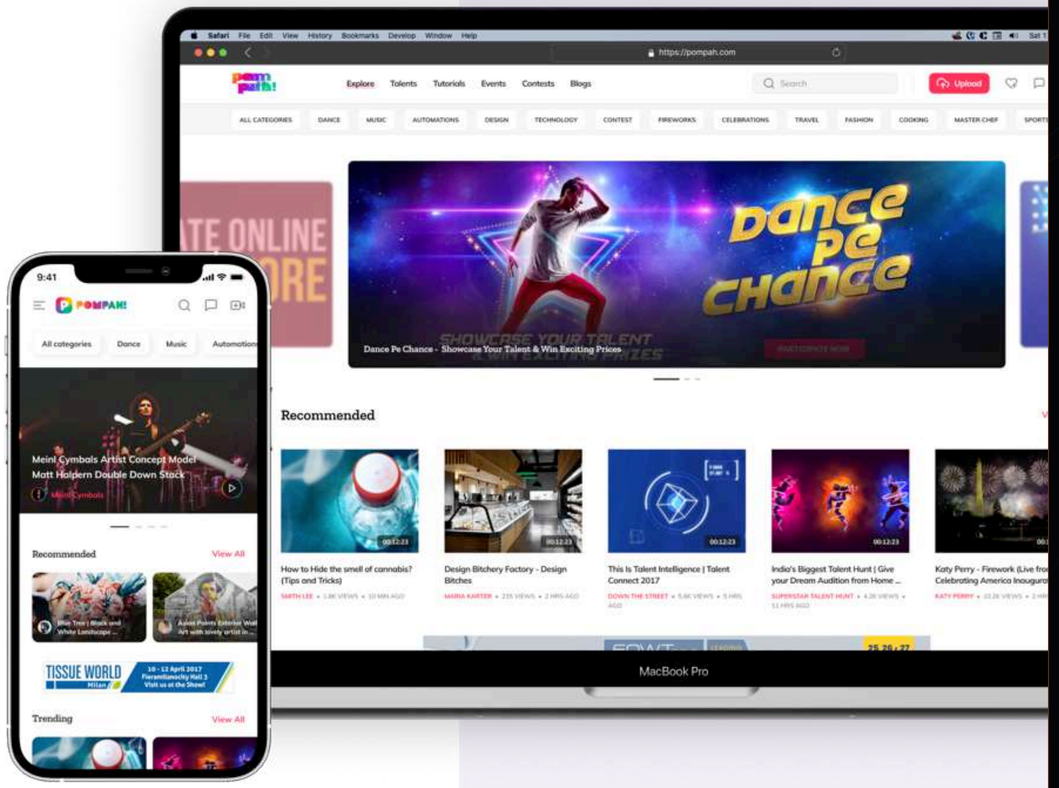

Social Media Platform

Online platform exclusively for talented artists

Industry • Web • Mobile • React JS • Python

The project was to develop a robust web and mobile application that serves as an online platform exclusively for talented artists. The platform aimed to moderate and verify artists' content, providing them with a genuine stage to express themselves, inspire others, learn, and monetise their skills. The features included video sharing similar to YouTube, tutorial enrolment like Udemy/ Coursera, contests for artists to showcase their performances, participation in events, and the ability to run a blog.

- The platform provided talented artists with a dedicated space to showcase their work and connect with a like-minded community.
- The content verification process ensured users could access original and trustworthy content.

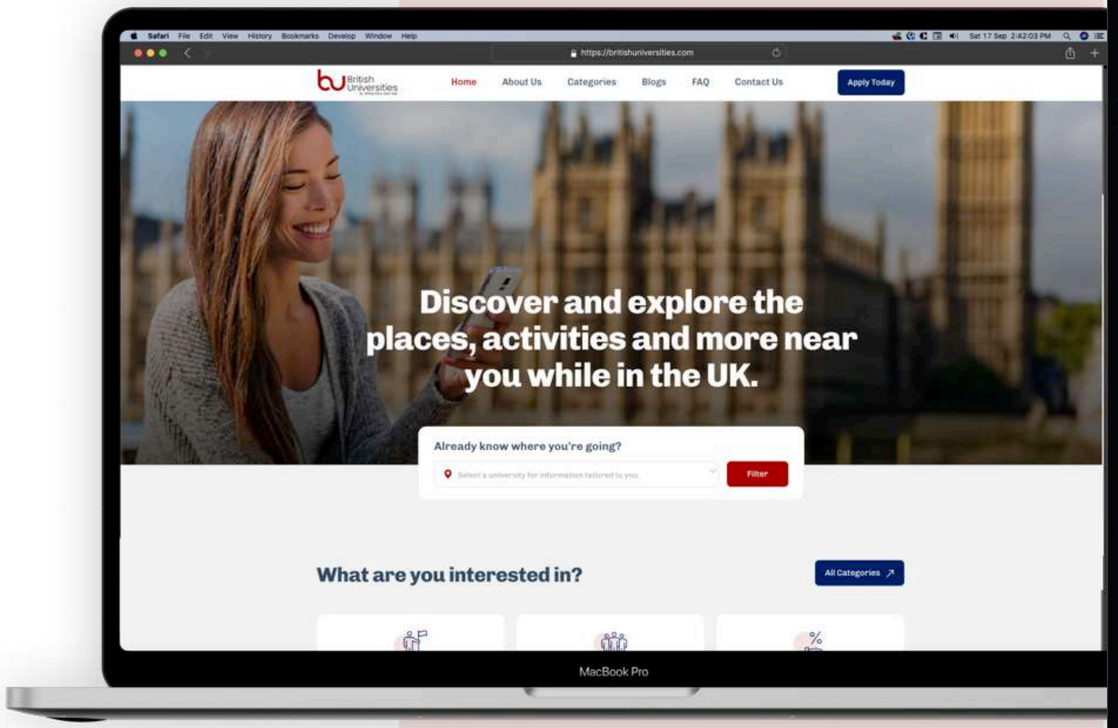

British Universities
By Global Education Hub

Website for UK university students

Education • Web • Wordpress • HTML

The project involves creating an informative website for UK university students. It will provide comprehensive resources on student life, including health and well-being, sports and personal growth, housing guidance, and information on cultural events. The goal is to enhance the university experience by empowering students academically and culturally.

- Our key benefits include a streamlined user registration process, extensive category coverage, dedicated food and travel blogs for immigrant students, and direct communication with university administration, enhancing the overall university experience for students in the UK.

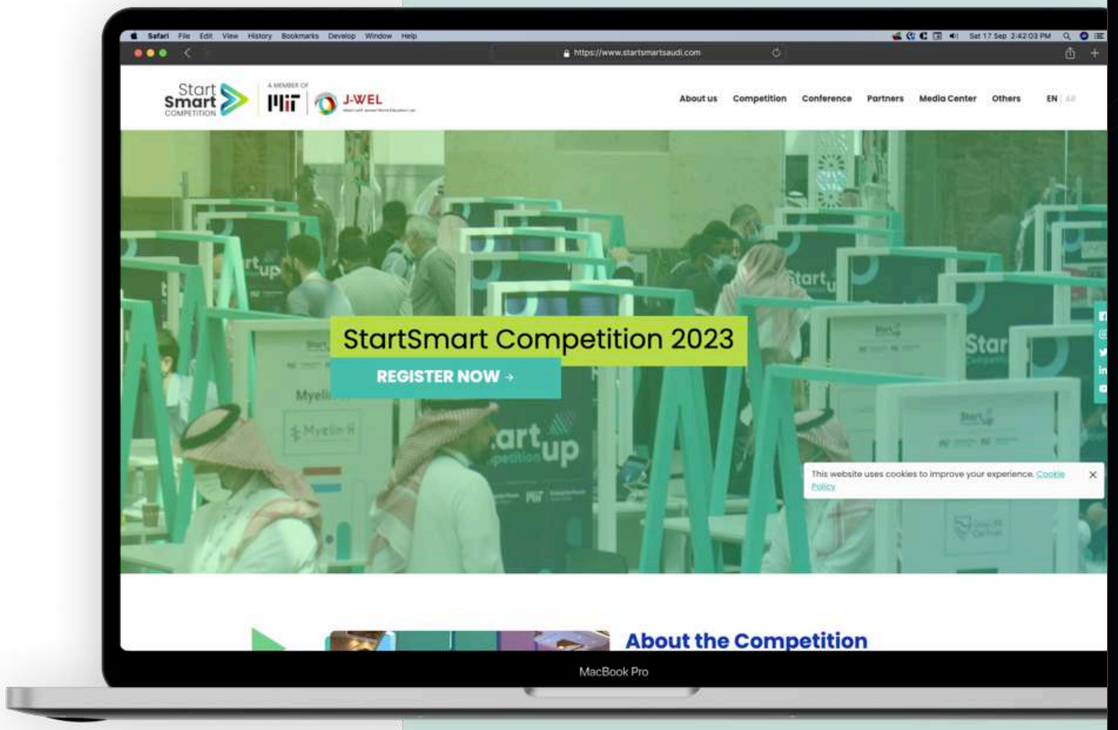

J-WEL Abdul Latif Jameel World Education Lab | A MEMBER OF MIT | مسابقة ستارت سمارت

Website for Global Startup Accelerator – StartSmartSaudi

Worldwide Startup Incubator • Wordpress • Html

The StartSmart Competition is a platform that brings together aspiring entrepreneurs in four tracks: Ideas, Startups, Social Entrepreneurship, and Environment. Participants compete by presenting their innovative ideas or ventures. Twelve winners are chosen, three from each track, who receive cash prizes and various support activities such as mentorship, networking, workshops, and exposure to investors. The competition aims to nurture talent, foster innovation, and create a vibrant entrepreneurial ecosystem focused on driving positive change.

- Enhanced visibility and accessibility for the StartSmart Competition, attracting a wider audience and increasing participation.
- Streamlined competition management processes, including registration and evaluation, improving overall efficiency.

Social Shelf

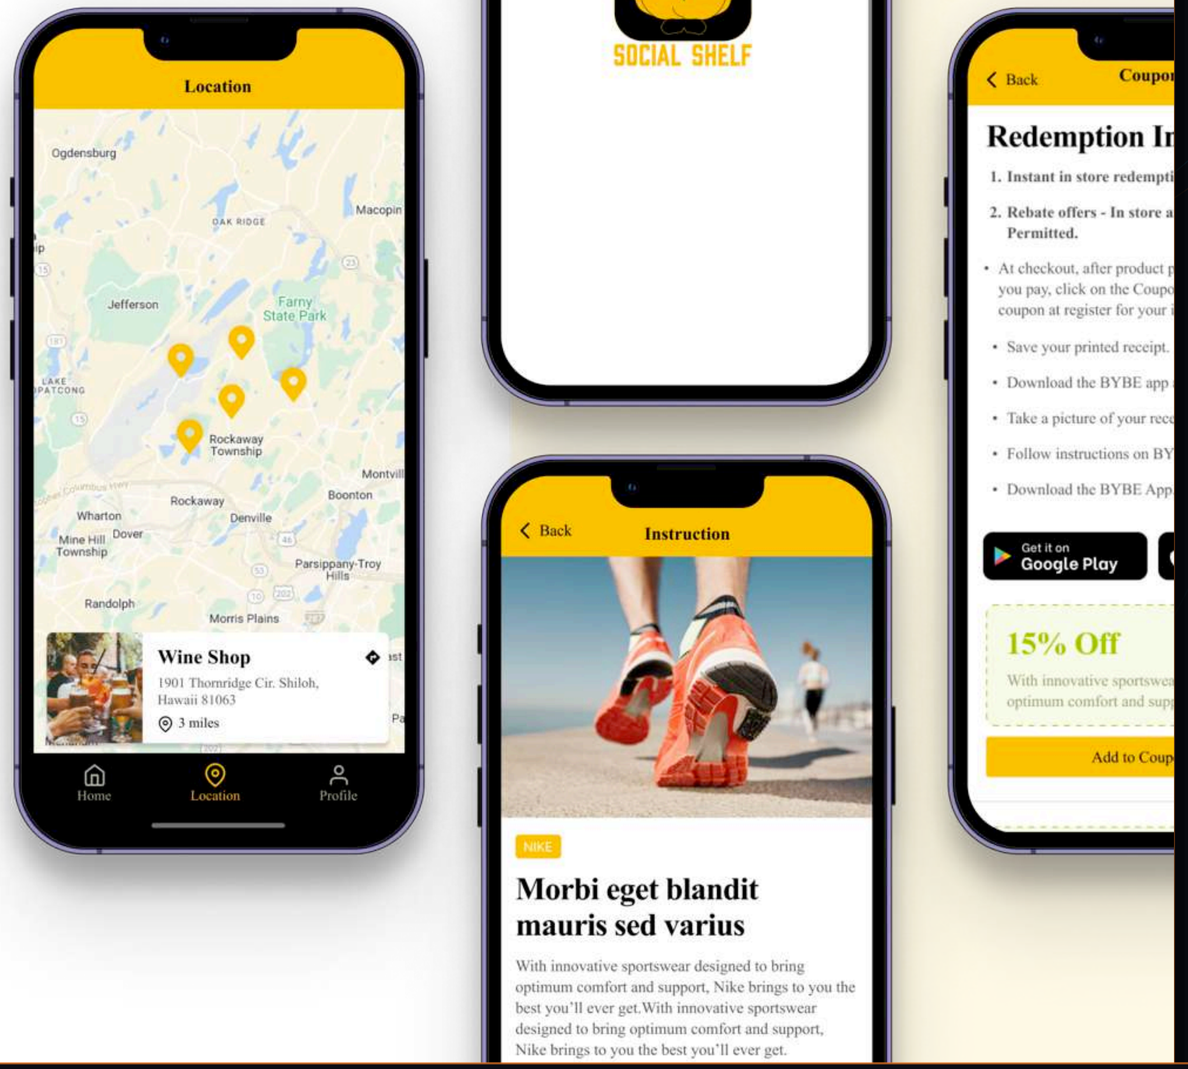

Advertising Tool

Boosting smaller brands through focused advertising.

Social networking • App • iOS • Android

Social Shelf would be developed as an advertising tool that would allow an indeterminate number of smaller brands/products an opportunity to advertise to consumers at retail & e-commerce sites when they are right in front of their product. 100% user initiated, by scanning a QR or label (image) the consumer would be linked to a unique URL, to receive an advertisement for that brand.

- Social Shelf expands advertising reach for smaller brands at retail and e-commerce sites.
- Precise audience targeting ensures ads reach interested consumers.
- Access to previously inaccessible and affordable advertising spaces.

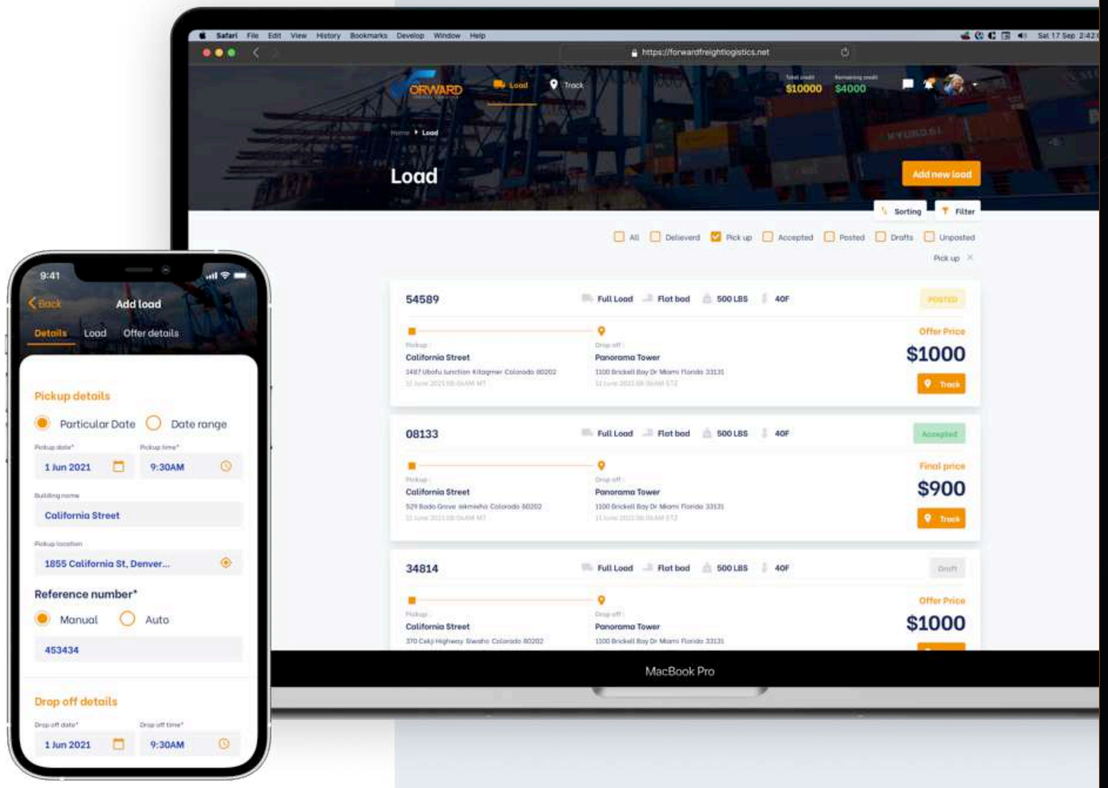

FORWARD FREIGHT LOGISTICS

Leading provider of freight management solutions

Logistics • Web App • iOS Android

Forward Freight Logistics is a leading provider of freight management solutions, offering all types of freight forwarding services to large and small companies worldwide that want to use cutting-edge technologies in their operations.

- Optimal freight equipment availability at each touchpoint ensures efficient operations.
- Automatic emailing to customers improves communication and transparency.
- Simplified order reporting accelerates decision-making processes.
- Efficient and timely tracking of finance and accounting details promotes fiscal health.
- Efficient job forwarding boosts operational coordination.

Admire Dental Care
Smile With Confidence

Revamped website to attract visitors, enhance user engagement.

Healthcare • Web • Wordpress • Html

Admire Dental Care is a client that had their WordPress website developed by our team five years ago. They approached us with the objective of improving their website's overall performance and user experience. The primary goals were to increase website traffic through enhanced SEO strategies, improve mobile responsiveness, update content and images, integrate Google Maps and reviews, and introduce new functionalities like chat, promotions, membership pages, and multi-language support. Furthermore, they wanted a blog redesign and improvements to various sections for better engagement.

- The implementation of SEO upgrades and enhanced functionality contributed to a significant increase in website traffic.
- The mobile responsiveness improvements and redesigned sections resulted in a better user experience across devices, leading to increased engagement and longer browsing sessions.

ALYNEX ARTIFICIAL INTELLIGENCE

ISB | Centre for Learning and Management Practice

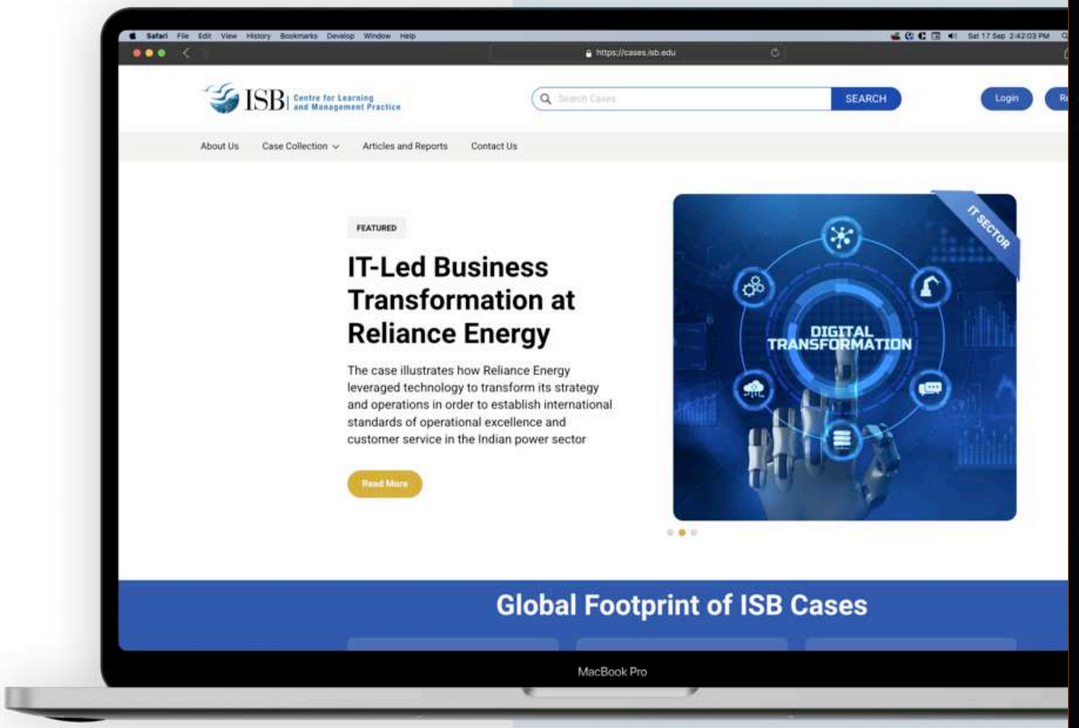

Crafted ISB's global platform for case study sales.

E- Commerce • Web • Php • MySQL

The core problem was the dependency on Harvard's platform to sell the case studies with a commission fee as high as 60% on annual sales. Having their own eCommerce platform could save them from paying high commission fees and improve their brand identity in the education sector.

The in-house eCommerce experts suggested unique features and delivered a custom online store to sell ISB case studies with sharp, attractive, and user-friendly UI/UX that perfectly incorporates the brand's authenticity.

- Faculty and students from various business schools can easily access and purchase case studies tailored to their needs.
- The platform's accessibility to interested individuals worldwide broadens ISB's reach and impact.
- A user-friendly interface and smooth navigation contribute to a pleasant experience for customers.

Their mission is to foster self-confidence and independent study habits among students by combining education with entertainment in a unique learning platform.

- Ease of use for any age promotes inclusivity and broad applicability.
- The tool is ideal for parents and teachers to engage children in fun and effective spelling tests.
- The app aids in long-term retention of spelling words, ensuring children never forget how to spell particular words.
- The ability to create multiple profiles allows for personalized user experiences and word lists.
